

BuddyDrops

Sterile moisturizing and lubricant long-lasting ophthalmic solution that contributes to your pet's eye hydration. BuddyDrops increases the contact time of the drop on the ocular surface, reducing the need for repeated applications of the product and thus improving therapeutic compliance.

Indications

BuddyDrops is an eye drop indicated to relieve dryness and eye irritation caused by situations of insufficient hydration or external environmental factors.

Composition

BuddyDrops is formulated with ectoine (2%), sodium hyaluronate, carboxymethylcellulose, disodium hydrogen phosphate dodecahydrate, sodium dihydrogen phosphate dihydrate, sodium chloride, purified water, ethylenediaminetetraacetic acid (EDTA) and benzalkonium chloride (preservative).

Properties

Due to its formulation, BuddyDrops:

- + Alleviates dry eye and dry eye sensation.
- + Alleviates eye irritation.
- + Protects against external allergens alleviating allergy symptoms.
- + Regenerates and stabilizes the tear film

Technical Specifications

- + Visual aspect: transparent liquid.
- + Physiological pH.
