

SHADE SAILS
CANADA

DROP AND FLY

Our Drop and Fly service is available to all customers and aims to help you manage your Shade Sails safely and efficiently, allowing you to better concentrate on your business. This service also extends your warranty; if we fly it, we guarantee it.

DROP

We carefully untension your Shade Sails and inspect for any wear and tear on the fabric, cables and tensioning hardware.

We note any defects that may require attention.

We carefully fold and prep the Shade Sails for storage at your facility.

FLY

We re-fly your Shade Sails for the season and correctly tension to accommodate wind loads (a common failure when not tensioned correctly).

We replace or repair hardware as required.

We ensure each tensioning component is locked in place.

We note any issues so that the life expectancy of your Shade Sails are optimized.

Call or Email us - we can help you maximize your shade sail's life expectancy, appearance and performance.
