Taste the spirit of Australia's Tropical Far North

Paradise awaits from where it feels like Summer year-round. Our gins and liqueurs are infused with luscious North Queensland tropical fruits and rainforest botanicals.

We love that every day in Far North Queensland is like one island vacation, and this Wolf Pack's passion is to give you a taste of just how good that feels.

Our wildly exotic take on gins are steeped and vapour-infused with the ripe fruit, and rainforest flavours of a tropical Queensland Summer. With every luscious sip, you'll be spirited away to our little piece of paradise.

In our tropical gins, you'll taste flaming sunsets over sapphire seas and sun-ripened local mangos, so plump with sticky-sweetness they drop from the trees.

Deep dive into dense rainforest canopy with tangy bursts of native finger lime caviar, tart wild-growing Davidson Plum, the woody notes of cinnamon-scented Pepper Berries and heavenly Daintree Vanilla.

Here's cheers to gin that is quintessentially Cairns in character. Gin that is infused with tropical fruits, vanilla pods and coffee beans from surrounding plantations and a bounty of exotic native botanicals foraged from the 180 million year old ancient rainforest which we call our backyard.

Wolf Lane Flight Board

Sample three Wolf Lane Gins (15mL pours), and then try them as mini G&Ts with Fever-Tree premium tonic or soda water and matching garnishes.

- Tropical Gin / Ruby Red Grapefruit
- Navy Strength Gin / Lime
- Davidson Plum Gin / Orange

Add on another gin or liqueur for extra.

Cocktails

Illegal Mezcal
Patron Reposado
Patron Silver
1800 Coconut

Proudly mixed with Fever-Tree Premium Mixers.

TROPICAL GIN

The one that started us on our gin journey, Wolf Lane Tropical Gin brings together thirteen botanicals that are both steeped and vapour-infused to create a taste of the tropics. We use some of the usual suspects: juniper, angelica, cinnamon, cardamom with the addition of native lemon myrtle, pepper-berry, and macadamia. But we think it's the vapour-infusion of fresh local ruby grapefruits, mangoes and finger limes that sets our Tropical Gin apart. Making it a well-balanced, citrus-forward summer gin that will always have a special place in our hearts... and our glass.

Perfect served with soda and a slice of ruby grapefruit, our Tropical Gin is also a welcome addition to any classic gin cocktail.

ABV / 42.5% | 200mL / 500mL / 700mL

NAVY STRENGTH GIN

What's strong, smooth and makes a great G&T?

With our distillery on the doorstep of the Pacific Ocean, it would have been remiss of us not to create a Navy Strength gin. Coming in at 116 proof (58% to you landlubbers), Wolf Lane Navy Strength packs all the punch of a drunken sailor with heavy juniper and finger lime but goes down as smooth as silk as you enjoy the flavours of fresh grapefruit and macadamia.

We think it's the perfect way to end the day and has a bit of a cult following among our Wolf Pack. Wolf Lane Navy Strength should definitely be on your radar if you're a keen G&T drinker or enjoy sipping your tipples over ice.

ABV / 58% | 200mL / 500mL / 700mL

DAVIDSON PLUM GIN

Here at Wolf Lane, we love using native Australian botanicals as much as we love to support our local farmers. So, when the opportunity arose to do both, we jumped at the chance.

Wolf Lane Davidson Plum gin is our tropical take on the traditional sloe gin, swapping sloe berries for locally grown Queensland Davidson Plums. A labour of love, we steep the plums for up to three months in our gin, to deliver a truly unique, fruit-forward flavour.

Wolf Lane Davidson Plum gin is made to be enjoyed in every way. Simply with soda, over ice at the end of the night, or as a cheeky addition to your bubbles. A favourite of the Wolf Pack and a must-try is a Wolf Lane Davidson Plum Gin Sour, you can thank us later.

ABV / 33.2% | 200mL / 500mL / 700mL

GRAPEFRUIT APERITIF

Prepare to fall in love with our Grapefruit Aperitif.

Leaving behind the bitterness of traditional aperitifs, we've captured the fresh, fruity and citrus profile of ruby grapefruits to bring you the perfect addition to summer drinking.

We source our fresh fruits and botanicals from the tablelands and FNQ surroundings, including pepper, lemon myrtle, lemon aspen, lillipilli & many more.

Served over ice, with soda or in your favourite spritz cocktail, tropical holiday vibes will be coming your way!

ABV / 20% | 700mL

THE BARISTA COFFEE LIQUEUR

Wolf Lane's 'The Barista Coffee Liqueur' was born out of a pursuit to create a coffee liqueur that would showcase the quality of coffee we have here in the tropics. Working with local coffee and vanilla growers, we were able to produce a coffee liqueur for the lovers of good coffee.

The Barista Coffee Liqueur delivers a full coffee kick, with chocolate notes from dark roasted, locally grown beans and natural sweetness from Daintree vanilla. If you want to make the perfect Espresso Martini, look no further. We also like to keep a bottle chilled to pour over our favourite vanilla ice cream for that late-night pick me up.

ABV / 22% | 700mL

ANNEE'S VIETNAMESE COFFEE LIQUEUR

In collaboration with the legendary Annee's Caphe Sua Da, Wolf Lane Distillery presents a Vietnamese Coffee Liqueur. This coffee liqueur showcases Vietnamese Robusta coffee at its finest with a bold & strong coffee hit paired with sweet caramel tones.

Annee's signature Coffee brew is paired with Wolf Lane's distilled vodka, making for a perfect espresso martini or enjoy straight over ice.

ABV / 22% | 500mL

THE DISTILLATION PROCESS

Our custom 8 plate column still named Column Farrell (a pun on the actor Collin Farrell) produces an unbelievably clean spirit as it passes through the copper plates. This clean spirit (ABV 96%) is diluted down before steeping our dry botanicals. After this, we add our fresh botanicals, all sourced from local farms in Far North Queensland to our copper gin basket which is vapor infused into the gin.

VAPOUR INFUSION

Our vapour infusion involves placing the fresh and delicate botanicals in our copper gin basket which sits above the base spirit. As the ethanol begins to vaporise, it passes through the botanicals and becomes infused with their oils and flavours. These will stay locked into the vapour as it is condensed and transformed back to a liquid state. This is a less intense form of distillation as the botanicals aren't being directly soaked and macerated in the base spirit, meaning these botanicals will have a much more subtle flavour than the ones which have been steeped overnight.
