In the long-term chart the Dollar bulls are encouraged by the multiple failures of the Euro to break above 1.10 – the big diagonal resistance at the bottom of the parallel channel.

Those **four** earlier failures are a lot clearer in this chart.

So the Dollar bulls are encouraged to begin to believe in a multiple top – if the latest rally in the Euro fails too...

When would it be confirmed? On a break beneath 1.05.

Dollar Sterling Monthly spot cash chart

Bouncing hard off the 1.0520 pivotal low from the 1980s.

It's an impressive bounce.

Dollar Sterling Monthly spot cash **LINE CHART** based on closes

And the bounce looks to have smashed through this band of resistance at 1.2144.

The market broke up through the resistance band, and closed above at the end of the month to confirm that, for the moment, the chart remains bullish for Sterling.

Short-term, his latest push above the prior High at 1.2827 **was not sustained** – the sterling bulls needed that to be a lever to ratchet higher still.

## Dollar Yen monthly spot cash chart

The market has stalled at the near-term Prior High of 151.94 in 2022.

And the long-term prior High of 147 in 1988 has not YET been overcome.

To convince the Dollar bulls, the market has to break above that band of Highs.

So Bulls now need a close above 151.94. Close, but not yet.

## Dollar Yen weekly spot cash chart

Bulls need a close above the 151.94 to convince.

On the other hand a third failure here would be very bearish!

Watch the price action at the pivotal band from the Prior Highs 148.74-151.94.
