

T5 HO 4FT 8 LAMP LED GROW LIGHT

Energy Saving & Lower Heat

Uses 60% less energy than 54W T5 HO fluorescents when used with Active Grow 25W T5 HO LED Lamps, saving over \$960 in energy costs over the lifetime of the lamps.*

Sun White Spectrum

High CRI 95 full-spectrum light accentuates plant colors, making visual inspection easier. Includes additional Red and Far-Red wavelengths to boost photosynthesis rates.

Bypass the Hassle – Line Voltage Lamps

Lamps run directly off line voltage 120-277V. No ballasts means no buzzing, flickering, compatibility or longevity issues, giving your plants pure, uninterrupted lighting.

Shatterproof Design

Each lamp's transparent PC body protects against water damage and shattering without sacrificing photon output.

Ready to Grow

Comes complete with 8 LED tubes and 120V power cord which can also function as a daisy chain cable. Dual on-off switches allow growers to run 4 or 8 lamps.

Extra-Long Lifetime & Guarantee

Active Grow 25W T5 HO Ballast Bypass LED Lamps feature an exceptional 30,000-hour lifetime. Each fixture has a 3-year warranty.

Active Grow Sun White Spectrum Formula

PBAR Range (280-800 nm) Plant Biologically Active Radiation

UV 280-400 nm	Blue 400-500 nm	Green 500-600 nm	Red 600-700 nm	Far-Red 700-750 nm	Infrared 750-800 nm
0%	19%	36%	38%	6%	1%

Blue 400-500 nm
Improves overall plant health and quality including taste, aroma, color and nutrition. Helps promote plant compactness and root development.

Green 500-600 nm
Increases overall plant photosynthetic efficiency and penetrates the canopy to encourage growth of lower leaves. Makes detecting issues like pests and disease on plants easier to see.

Red 600-700 nm
Promotes plant photosynthesis and increased biomass. Essential for leaf expansion and stem growth. Helps regulate plant flowering, photoperiod and germination.

FR/IR 700-800 nm
Promotes expansion and stretching of leaves and stems. Penetrates the canopy to encourage growth of lower leaves. When used with 660-680 nm wavelengths, plant photosynthesis rates increase via the Emerson effect.
