Philips - Advance	ICN2S24T	PS	OK
Sylvania - Quicktronic	QHE2X39/24T5HO/UNV PSN	PS	OK

Important Notice

This ballast compatibility list is for reference when choosing a ballast and lamp combination. The list above features Programmed Start (PS) ballasts tested for compatibility with the aforementioned lamps. While each ballast model listed has been tested, some ballasts may have been revised which may change operating parameters and impact lamp performance. Applications and conditions are variable so users should make their own determinations as to the suitability of a lamp-ballast combination for their specific application and use. Compatibility may also extend to ballasts not included on this list. When compatibility is unknown, Active Grow recommends users test lamps with their fixtures to determine compatibility for their application.

This list is current as of July 2020. We are constantly testing for compatible ballasts. Please check back for the latest updates to this list online at www.activegrowled.com.
