Sizing Guide

BRACELETS

Our bracelets are measured by the circumference of your wrist. You may measure your wrist size with measuring tape or with a piece of string. Wrap it around your wrist and measure the length.

RINGS

If you have a ring that already fits you, use the template here to find the ring's size by placing the ring inside the best matching circle. Once the ring is placed in the matching circle, you should only see the inner white circle space of your ring. If you are in between sizes, we recommend you select the bigger size of the two.
