

How to update your EnergyWatch

2023-01-22 - Waltrix AB

- Enter your email when configuring your
 Energywatch
- This will send you an email with the address to access settings
- If you have already installed your Energywatch, you can find the IP address in your router. If you don't know how to find the IP, you can reset the Energywatch by pressing the reset button on the back twice and follow the instructions above

Refresh networks	

 Continue the configuration and connect your Energywatch to a Wi-Fi with internet access

 Before version 2.5.5, the email is wrong and may have a title that consists of Swedish letters. The clickable link might also be missing, but the Ip address should be there

• Make sure to check your spam folder
