The Yeelight LED Bulb 1S Color comes equipped with an E27 base that will fit in a standard light socket.

The dimmable bulb is temperature-tunable from a very warm 1,700 Kelvin (a color that resembles candlelight) to 6,500 Kelvin (resembles nomral daylight).

The bulb can also glow in up to 16 million colors.

Product Model
Yeelight Led Smart Bulb Colour 1S

Product Size
60 * 116 mm

Power
8.5W

Colour Temperature
1700k - 6500k

Luminous Flux
800lm

Type
E27

This is the very 1st Yeelight Bulb with Apple Homekit direct support.

Compare to non LED bulbs of the same brightness we have an energy saving of up to 80%.

The lifespan of the Yeelight Colour 1s bulbs is up to 25000 hrs.

*3 hrs usage per day the bulb will easily last for up to 8 years.

For Yeelight Colour 1s you can adjust bulbs individually, or group multiple bulbs together to synchronize lighting for a whole room, and control them no matter where you are.

Program these lights to gradually turn on so your room will be well-lit by the time your alarm goes off. Or prepare for bed by programming the lights to slowly dim as you drift to sleep.

Ambient 16 Million colour | Cool & Warm Light | Dimmable | Voice Control | Quick Setup | Personalized Schedule | Smart Interaction

The smart LED monitor light from Yeelight, illuminates the area in front of the monitor without shining on the screen itself and creating reflections by placing it on top of the display instead of a classic desk lamp.

Frame is set. In this way, it creates light and space on the desk and illuminates the user's keyboard even in dark ambient light.

The Yeelight LED Screen LightBar Pro is also interesting for gamers, because it not only emits dimmable, white light in front of the monitor, but also in RGB colors behind the monitor.

Product Model

(Charger not included)

Via Razer Chroma and Overwolf, this RGB lighting can be linked and synced to the rest of the system, games and music in order not only to serve as mood lighting, but at the same time to increase immersion in the game.

The frame of the display must not be more than 32 mm thick so that the bracket can still be attached correctly. The recommended minimum thickness is 10 mm, but the screen can also be thinner.

The monitor lamp is not intended for notebook displays.

WORKS WITH amazon alexa   works with Hey Google

Serene Pro uses the cutting-edge SunLike technology, creating a light that is very similar to natural daylight, which limits the amount of harmful blue light and protects the eyes.

The patented technique creates a flexible desk lamp for all heights. The desk lamp's smart timer feature gently reminds the child to take a break to prevent damage to the eyes.

Using the cutting-edge SunLike technology that has been awarded with the German Elektronik Best Product Gold Award, Yeelight creats a distinctive desk lamp. Serene Pro uses violet light (while the typical LED uses blue light) in light generation, thus reducing the amount of harmful blue light and creating a better, eye-friendly light.
