

NOCRY

**Because keeping you safe is our top priority...
Please take a moment to read through the following
care and use instructions for your new glasses.**

1 The NoCry glasses

The lenses have a UV400 protection filter against both UV and blue light, along with anti-fog and anti-scratch treatments.

2 Cleaning your glasses

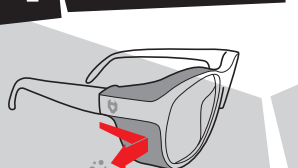

Clean the glasses only using a dry or water-moistened soft micro-fiber cloth. Do not use chemicals or alcohol.

3 Storing your glasses

When not in use, store the glasses in a protective case (sold separately). Store them dry and away from direct sunlight.

4 Protective side panels

The wraparound design with protective side panels shields your eyes from dust, pollen and other flying particles.

5 Attention!

These glasses are not designed to be worn on top of prescription glasses. If this is your purpose, find an appropriate model at nocry.com or reach out to us for help at wecare@nocry.com.

6 Carefully assess your working environment

Make sure that the glasses are the most suitable means of protection from potential threats you are likely to be exposed to in your working environment.
