

NOCRY

Because keeping you safe is our top priority... You must read through the following care and use instructions before using your new goggles.

1 The NoCry 6x1 and 6x3 goggles

Anti-scratch

Anti-fogging

Slip the goggles over your head and adjust the headband until they feel snug and comfortable against your skin.

2 Cleaning your goggles

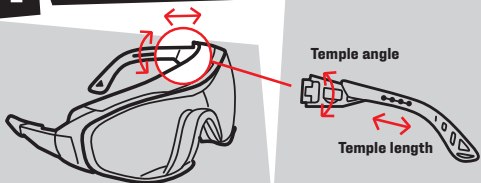

Clean the goggles only using a dry or cold water-moistened soft micro-fiber cloth. Do not use chemicals.

3 Attention for 6x3 goggles!

First measure that your glasses fit correctly inside, so they won't touch and rub against one another. While goggles have anti-fog coating, prescription glasses can still fog up. We recommend to use an anti-fog spray in case the issue appears.

4 Temple adjustment settings (only 6x1 model)

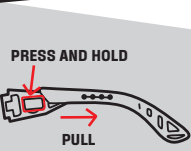

Temple angle

Temple length

The adjustment settings help the goggles fit your face securely and comfortably. Adjusting the temple angle can also control the airflow.

5 Replacing temples with the elastic band (only 6x1 model)

PRESS AND HOLD

PULL

Make sure that the L (left) and R (right) markings on the temple attachment correspond with the left and right side of the goggles.

Press and hold down on the area shown on the image and pull simultaneously to release. Slide the clip back on the frame and click in place to attach.

6 Storing your goggles

When not in use, store the goggles in a protective case.

7 Carefully assess your working environment

Make sure that the goggles are the most suitable means of protection from potential threats you are likely to be exposed to in your working environment.
