

You must read through the following care and use instructions before using your new leather gloves

1 The NoCry Leather Work Gloves

Made of 100% grade A goat leather. Gloves have double-layered fingertips and palms.

2 Take good care of your gloves

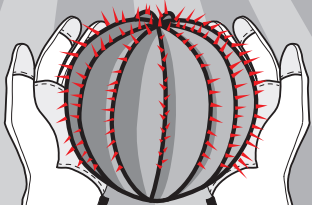

Use a dry suede brush to remove dust and dirt from your gloves. If the gloves need a good clean, mix a soft ph-neutral soap (e.g saddle soap) with water and give the gloves a gentle rub. Rinse with lukewarm water and hang the gloves to drip dry. Do not machine wash. To preserve the natural oils in the leather and prevent the gloves from getting brittle, apply a leather conditioner to your gloves after washing them.

3 Storing your leather gloves

Store the leather gloves in a cool and dry spot, away from direct sunlight and heat.

4 Puncture resistant, not puncture proof!

The gloves are designed to offer protection against accidental pokes and jabs from sharp edges and pointy objects while gardening, building, fencing, or doing any other general labor work. Please remain careful while using them.

5 Fitting your gloves

To loosen the string, pull the plastic part backward.

Slide your hand into the glove and pull the adjustable cord on the wrist to tighten the opening. This will secure the cuff and less dust or dirt can get into the gloves when wearing them. You may twist the loose end with the main cord.

6 The gloves are not indestructible!

not fireproof

not indestructible

not cut proof

The gloves will not make you invincible. They do have their limits and work best when used with caution. **You must be extra careful when operating power tools with these gloves!** The gloves do not have a skintight fit and if a moving part of a power tool touches the glove, it can pull the gloved hand towards the machine. Avoid getting the gloves wet while wearing them.
