

JUGGERNAUT MINI EXPANSION

Robots building robots. That's how it always starts. Before you know it, they've improved upon the model and you are left to figure out how to control their new creation.

Juggernaut Rules

JUGGERNAUT CITY TILE

When playing with the Juggernaut Promo, do not shuffle the tile in with the City tiles during setup. Instead, place the Juggernaut City tile in the center of the 3x3 grid. It should still be placed face down with a Discovery token on it to be discovered as normal, but all players should be aware that it is included in the center of the City. When discovered, place the included Juggernaut Miniature on the Juggernaut tile to be used as described on that tile.

JUGGERNAUT GEAR

Whenever you play with the Juggernaut City tile, make sure that the Juggernaut Gear is included in the Gear Bag before starting play. Simply remove 1 random Standard Gear from the bag and add the Juggernaut Gear instead. In games where you are not using the Juggernaut Promo, make sure the Juggernaut Gear is not included.
