PRICE INCREASE

September 6, 2017

To: All APOC Customers

Dear Valued Customer,

Please be advised that recent disruptions in the production and supply of various resins, chemicals and other raw materials have resulted in immediate increases and supply shortages. These raw material increases and shortages are beyond our control and will have implications far beyond the roofing and waterproofing industry.

Effective November 1, 2107, APOC will be implementing a 6-12% price increase. Increases will be applied on a product by product basis and new pricing will be available in early October. Be assured that we are committed to providing our customers with the quality, service and dependability you have grown to expect from our organization.

Thank you for your continued support!

Best Regards,

Bob Hyer
