705 POLYSET® RTA-1 ROOF TILE ADHESIVE

APOC Polyset® RTA-1 is a one-component, polyurethane foam adhesive specifically designed to bond concrete and clay roofing tiles to approved underlayment on new construction, reroof, or tile repair projects. The unique product properties and professional dispensing unit give RTA-1 many advantages over the use of traditional fastening methods such as mortar, nails, screws, or other one-component adhesives.

USES:

- Designed to bond concrete & clay roof tiles to approved underlayments
- Virtually eliminates deck penetrations & tile damage from mechanical fasteners
- Ideal for installing cut pieces at hips/valleys
- New construction, reroof & tile repair applications

FEATURES:

- Approved for use in the most stringent high-wind regions of the world
- Prevents tile chattering
- Adjustable flow rate on the gun hose assembly allows for a more precise bead application with less nozzle leakage
- Can be used on wet or damp substrates
- Saves time & labor by allowing for a faster, easier, and controlled application
- All-in-one, portable & disposable foam adhesive
