

NEW PRODUCTS

PrimoSource Building Products, an international distributor of building materials for residential and commercial needs, has launched **UFO gloves**, a brand new line of quality gloves designed with new levels of comfort and fit to promote hand safety and dexterity. The glove line includes **UFO Clean Mutties**, **UFO Industrial**, **UFO Professional** and **UFO Tradesman**. **UFO gloves** will be available through the PrimoSource network of pro-contractor supply locations and pro-supply locations like **88 Lumber** and **88FC**. For more information about **UFO gloves** and all of the PrimoSource Building Products line, visit www.primosource.com.

Water-Resistant Synthetic Gable Roof Underlayment (WRSG) is a revolutionary synthetic, long-life roofing underlayment. WRSG three-layer construction consists of a polypropylene top surface for enhanced durability, a middle non-soluble layer, and a non-soluble bottom layer. For more information, visit www.mazpro.com.

APOC Weather-Armor FT³ Fleece-Top underlayment is your state of the art, premium roof underlayment and leak barrier designed for tile and metal roofing. Weather-Armor FT³ Fleece-Top features the patented Tri-Bond 3-component adhesive system and patented RST Reinforced Seam Technology, building the strongest and most durable underlayment in its class. Manufactured with dual reinforcements, heavy weight polyester and high tensile glass reinforcement, APOC Weather-Armor FT³ provides exceptional strength, durability and waterproofing capabilities. Use FT³ with foam adhesives, mechanically attached systems and hybrid systems that combine both foam adhesives and mechanical attachments. Learn more at www.apoc.com or contact your APOC representative.

The all new **HPA2™** single design from **Alta Roofing Corporation** is a cross-over roof panel with lower slopes and ribs. The 1.2 inch enhanced beam top roofing panel with **HPA2™** double-sided base helps cross-rib fasteners slide through easier, cover up roof more efficiently, they will be on end of the roof faster and so on to the next job. **Alta HPA2™** design is the new standard for the **Alta Corporation** Single, Double and Triple and Pro-pan design lines. For more information, visit www.altarofing.com.
