

SEPTIC GUARD™

WHAT MAKES SEPTIC GUARD SO EFFECTIVE?

A balanced septic means environmental conditions are favourable where enough natural occurring bacteria outcompetes all other bacteria or fungi present within the septic system. Due to the use of harsh chemicals, septic systems become unbalanced and create odours and blockages. **SEPTIC GUARD** Probiotic powered enzymes digest and liquify microorganisms by changing from a spore state to a vegetative bacterial state to maintain a septic system working efficiently.

SEPTIC CARE WITH SEPTIC GUARD

Maintaining a healthy septic system involves regular care. Challenges include avoiding excessive water and the use of harsh chemicals. Regular inspections and treatment should be carried out, to minimise sludge build-up and maintain the system's balance of beneficial bacteria all year long.

SEPTIC GUARD pods are designed for convenient system maintenance, to enhance performance by breaking down organic waste build-up, neutralising odours, chemicals, and restoring balance. With 12 pre-measured flushable pods per satchel, **SEPTIC GUARD** provides a year's worth of maintenance treatments. Simply drop a pod directly into the toilet bowl per month as a care routine.

Consider size of the septic tank and whether it's an initial control dose or maintenance dose, use the adequate amount as directed. One pre-measured pod services a standard tank of 2,500 litres. Establish regular septic system maintenance checks for optimal results. Consulting a septic professional can offer personalised insights for the specific system.

PRODUCT DETAILS

Product Name	SEPTIC GUARD Pre-measured Probiotic Pods
Order code	DP-SEP-12
Packaging	Carton of 15 x satchels, 12 x 40gm pods per satchel
Active Constituent	Powerful Enzymes charged with probiotics. Bacillus spore <10% w/w, Cellulase enzyme <10% w/w

APPLICATION

Initial Control Dose 2 per month | **Regular Maintenance Dose** 1 per month

Once a healthy biological balance is achieved in the septic system, simply drop one pre-measured pod into the toilet bowl and flush. The probiotic powered enzymes will balance the natural occurring bacteria in the septic system, ensuring freshness to the immediate environment. **SEPTIC GUARD** liquefies organic waste and noticeably reduces the malodours experienced by organic decay.

BENEFITS OF SEPTIC GUARD

- 12x pre-measured flushable pods promotes controlled use, no mess, mixing or diluting of chemicals.
- Australian owned formula, promoting local sustainability.
- Simple monthly maintenance dose: drop one pod to balanced septic system year-round.
- Eco-friendly, PH-friendly, biodegradable formula means it's safe around plants, animals, and people.
- Digests and liquefies waste and paper by breaking down organics and chemical solvents to maintain septic biological activity.
- Phosphate-free, formaldehyde-free, and preservative-free, ensuring a clean formula.
- Bioactive technology remains active for prolonged efficacy as it boosts the natural occurring bacteria.
- Powerful enzymes with probiotics prevent backups and neutralise odours effectively for a fresher environment.
- Safe to use in septic and wastewater recycling / effluent systems.
- Suitable for domestic and commercial use when used as directed.
