Note

Potency assays performed on the same harvest batch of fruits with varying states of age as present in batch to represent the potency.

<sup>\*</sup>For Research, Forensic, and Harm Reduction Purposes

<sup>\*</sup>Instrument Calibration performed using DEA exempt certified reference materials

<sup>\*</sup>Extracts are prepared in concentrations within DEA exemption limits

<sup>\*</sup>Samples are immediately rendered unusable upon completion of assay

<sup>\*</sup>Results are reported as percent by weight and milligram's of compound per grams of sample

<sup>\*&</sup>lt;LOQ means "Below Limit of Quantitation", meaning the analyte was not detected at or above the threshold of quantitation.
