Blix Launches Class 3 Fat Tire Ebike With Modular Design, Dual Batteries and Bluetooth Connectivity

SANTA CRUZ, Calif., April 19, 2022 – Blix, one of the leading direct to consumer ebike companies in the U.S., introduces the Ultra – a new all-terrain fat tire ebike with unmatched versatility designed around a dual-purpose concept for on-and off-road riding. Built with a modular design, the Ultra can be customized with Blix accessories for off-road adventure riding or everyday on-road riding with practical utility features and loading capacity of up to 200lbs, 150lbs in the rear and 50lbs in the front.

The Ultra is equipped with several high-performance features, including dual batteries with up to 1,344Wh capacity for a range up to 80 miles per charge, a strong 750w rear hub-motor with 90Nm torque making it one of the most powerful hub-motors available, 5-level pedal assist, throttle and a top speed of 28mph.

“The Ultra concept was to design an all-terrain ebike that is practical enough to fit into your day, furthering our mission to integrate health and activity into everyday life,” says Blix founder and CEO Pontus Malmberg. “This is the most capable and versatile ebike we’ve built, and it will bring a lot of value and differentiation to the table.”

The Ultra will also come with Blix Connect, a new connectivity platform that connects to a Blix app via Bluetooth to further enhance the rider experience by providing access to features such as ride data, community feed and over-the-air firmware updates when needed. Riders will be able to switch between class 2 and class 3 ebike modes through the app, making the Ultra on the first ebikes in the category with that capability.

“Connectivity is central in Blix product strategy and unlocks a whole new level of user experience and product improvements,” adds Malmberg.

The Ultra is also equipped with hydraulic disc-brakes, front suspension, large 4” tires to carry rider and cargo through rough terrain, sand, snow or soak up urban potholes for a more comfortable ride. Keeping with Blix focus on balancing clean design, user-friendly utility, strong performance and now connectivity, the Ultra sets a new standard for electric fat tire ebikes.
