FABER
FRANKE'S AIR EXPERT

A VISION OF GLOBAL REACH.

A VISION OF GLOBAL REACH.

FABER has a lot in common with air ... both are present all over the world.

Air has always been our chosen material. Now the world is our home. So it's only natural we should want to improve them both. Installing a kitchen hood is an easy way to improve the air in your home, of course, but only thanks to Faber. After all, we invented the kitchen hood, and we are making them better every day to provide our customers with the ultimate performance, quality and comfort.

Aspiring to a better world through leadership. Everywhere, every day.

WASH TECHNOLOGY

Saving water

Faber products can use as little as 10L water to wash a full load dishes, without compromising on energy consumption or wash quality. What's more, Faber satellite spray and intensive spray work efficiently and reduce water greatly.

A+ class energy efficiency level

Energy consuming less, efficiency improving more. Faber products have a heat exchange system which uses the heat generated in the wash cycle, to preheat the water for subsequent rinse cycles. No additional energy is required for the drying cycle and all energy gets a most reasonable utility.

Delayed start

The wash cycle can be delayed to make use of the most convenient time bands.

Auto

A special sensor sets the wash cycle in accordance with the soil level of the crockery.

Total safety

Faber dishwashers are fitted with safety systems to prevent the risk of flooding. Special devices cut off the water supply from the mains to the inlet point.

Dual Zone

This wash function allow to use either lower or upper basket when less utensils for washing, this will save consumption of water, time and energy.
