

**ECO-FRIENDLY
GIFTSETS**

2024

EXPANSION IN GREEN LINE GIVEAWAYS.

Green giveaways collection helps you achieve your promotional goals in a more sustainable way. The products in this catalog provide greener alternatives to traditional items. They are all fully or partially made of natural sustainable or recycled materials or provides a substitute for a commonly disposable everyday item.

ECO-Friendly items have several benefits besides reducing the amount of waste going to landfills. It uses waste materials to convert them into new products which reduces the use of fresh raw materials. Recycling materials need a fraction of the energy than the original production, which also reduces air and waste pollution

We encourage our customers to replace everyday disposable items with reusable alternatives and enjoy their advantages. Not only do they help reduce the amount of waste but they are safer as well

Implementing eco-friendly promotional products into your brand's overall marketing strategy is no longer a suggestion. It's a key if you want to reach today's consumer. By choosing sustainable materials you'll not only appeal to your customer and prospects but you'll establish a positive name for your company, thus improving your overall brand image

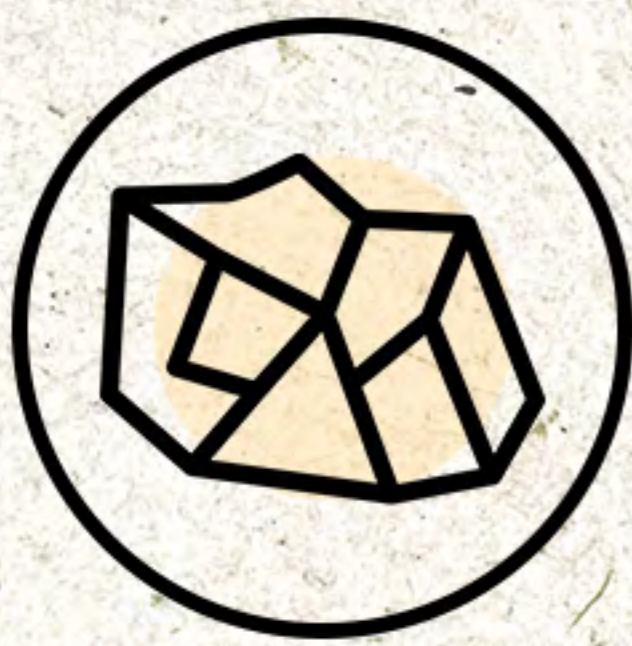

Future of green

NEW AND SUSTAINABLE MATERIALS FOR THIS YEAR

A great way to make your conference giveaways sustainable is to choose items that are made from recycled materials. Offsetting this usual useless waste by producing something completely new is a lifesaver when it comes to the planet

We offer you a great selection of items made of natural and recycled materials to contribute to our responsibility to have a more sustainable world, from the small collection we have expanded to cover much different materials

limestone cement

NATURE MIX

VIP A+ IDEAS WITH NATURAL MATERIALS MIXED TOGETHER

- **The concept behind luxury mix story**

The production with a vision to change the normal shapes into new next level in the industry is our vision for the new year. make every VIP client feel the power of nature with usable sustainable items to make them connected to their life and earth power as well. Here are we become with the concept of mixing too many materials in one set

After the success in providing wheat straw in Egypt for the first time, here we are expanding in producing the wheat stone collection themed with the office usability to make the gifted clients feel the nature from many aspect as well and also use the items in the gift from the first day and feel they are connected to the company whom send the gift

- **How we mix the items in the giftsets**

the bright light colors of kraft paper and wheat straw texture is the power of our producing new items and choosing the new generation in our eco-friendly gift sets as well. because we have a strong vision to make every item count in the gift set while you gift everyone in your audience they feel the power of your gift and feel the difference

WHEAT COLLECTION STRAW/STONE

one of the most successful patterns and usability in sustainable materials is the design and shape of wheat straw, special in nature and all clients fall in love with its hope

Renewable Resource: Wheat straw is a byproduct of wheat production, which means it is readily available and does not require additional resources or energy to produce.

Agricultural Residue: Wheat straw is often considered agricultural residue or waste. By using this material, it helps to repurpose and utilize a resource that would otherwise be discarded or burned, contributing to air pollution.

Reduced Environmental Impact: Wheat straw is biodegradable and compostable. When compared to traditional materials like plastic, using wheat straw reduces the environmental impact associated with non-biodegradable waste and helps minimize the accumulation of plastic in landfills and oceans.

Lower Carbon Footprint: The production of wheat straw products generally has a lower carbon footprint compared to materials like plastic or metal. Processing wheat straw requires less energy and emits fewer greenhouse gases, making it a more environmentally friendly option.

Versatility: Wheat straw can be used to create a variety of products, including packaging, tableware, stationery, and more. Its versatile nature makes it a viable alternative to traditional materials across multiple industries.

Consumer Appeal: As sustainability and eco-consciousness become increasingly important to consumers, using wheat straw as a material can enhance the appeal of products or giveaways. It demonstrates a commitment to environmental responsibility and can resonate positively with environmentally conscious individuals.

ECO-ELITE

THE LUXURY VERSION OF ECO-FRIENDLY GIFT SETS

- **The concept behind luxury eco-friendly collection**

After the success and widespread of eco-friendly, here we are the first to expand from business class only to the luxury segment of sustainable giftsets to the clients . Luxurious VIP giveaways, on the other hand, refer to high-end promotional items or gifts that are specifically designed to cater to VIPs or individuals in exclusive circles. These giveaways are often used by businesses or organizations to create positive brand associations and establish relationships

We choose Limestone is the reflection of the luxury icon for the VIP collection as it is a sedimentary rock made of calcium carbonate (CaCO_3). In many cases, the grains are microscopic fragments of fossil animal shells. Limestone (Calcium Carbonate) is a %100 Eco- friendly biodegradable resin, that is what makes it super special as the look and color is exceptionally unique and elegant

- **the secret behind choosing solid limestone material**

Clients when they choose gifting luxury people tend to go for solid dark colors to reflect the elegance from first sight when they send gifts to their important people who rely on brand loyalty and the image they capture their attention by choosing dark very luxury smooth shapes of the items and giftsets in a usable very modern shape that will be engraved in a very elegant design.

LIMESTONE CEMENT

Calcium carbonate (CaCO_3) is wide spread in nature. Calcium carbonate of all geological formations qualifies for the production of Portland cement. The purest grades of limestone are calcspar (calcite) and aragonite. Calcite crystallizes hexagonally, and aragonite is rhombic. The specific gravity of calcite is 2.7 and of aragonite 2.95. A macroscopic-granular variety of calcite is marble. It would not be profitable to use marble for cement manufacture.

The most common forms of calcium carbonate, most similar to marble, are limestone and chalk. Limestone is of a predominantly fine grained crystalline structure. The hardness of limestone depends on its geological age; usually, the older the geological formation, the harder the limestone. The hardness of limestone is between 1.8 and 3.0 of the Mohs' scale of hardness; its specific gravity is 2.6 to 2.8. Only the purest varieties of limestone are white.

1

Quarrying: quarrying from a quarry. Quarries are large, open-pit mines where limestone deposits are extracted using heavy machinery and explosives. The extracted limestone is typically in the form of large blocks.

2

Cutting and Shaping: they limestones are then transported to a processing facility where they undergo cutting and shaping. to cut the blocks into smaller sizes. The blocks that can be shaped into specific forms

3

Finishing: After the cutting and shaping process, the limestone pieces are typically finished to enhance their appearance and smoothness. This can involve grinding, honing, or polishing the surfaces of the limestone

4

Customization: Depending on the intended use of the limestone stone giveaways, additional customization may be performed. This can include engraving, etching, or applying decorative elements

USABILITY IN SUSTAINABILITY

different boxes with eco-friendly materials

- **The idea in cardboard boxes collection**

Lessons learned in human factors can support sustainability-related interventions building on experience in human-system interface design and visualizations that have been an integral part of the digital human modeling community.

After the success in providing wheat straw in Egypt for the first time, here we are expanding in producing the wheat stone collection themed with the office usability to make the gifted clients feel the nature from many aspect as well and also use the items in the gift from the first day and feel they are connected to the company whom send the gift

The importance of sustainability and environmental consciousness cannot be overstated today. As businesses strive to become more eco-friendly, one area where they can make a significant difference is through the choice of corporate gifts. Eco-friendly corporate gifts have gained popularity to demonstrate a company's commitment to a greener future. Such actions inspire others to adopt the same path while becoming mindful about creating a better world.

PRACTICAL ECO-FRIENDLY

SUSTAINABLE IN USABLE BAGS

● New Ideas in eco-friendly with multifunction

Gifts include reusable and organic products, energy-efficient gadgets, and items that support environmental causes. The list, however, is not restricted to these three categories. Let us go deeper into it and look at the various options available on the market.

Eco-friendly corporate gifts are items given to employees made from recycled and biodegradable materials. They are environmentally conscious, which aids in the reduction of waste and pollution while increasing sustainability.

While giveaways and merchandise are still an ever-popular tool for engaging with your audience at trade shows and events, we're all becoming a lot more mindful of the impact that these giveaways can have on the environment. Increasingly more and more businesses are now keen to stay away from "gimmicky" style giveaways that often end up in a landfill in favor of items that are eco-friendly and can have a positive impact on the environment.

● The Differentiation points of this collection

- 📄 unlimited mixture of natural products
- 📄 multiple sustainable materials
- 📄 many product designs and shapes
- 📄 different packaging sizes and designs
