

## Smart Water Timer

1

Congratulations on the purchase of your Smart Hose Faucet Timer !

Faucet watering has never been faster, easier or more convenient with the ability to control it from your phone.

You can schedule, manually operate without climbing through your shrubs to access the timer. You can connect to your timer with the push of a button via the home screen in the app. It also allows you to water down to minutes, which is great for gardening, hydroponics, filling pet dishes or even bird baths.

Whatever your connected outdoor watering needs, It provides best-in-class smart products to help you more effectively manage and control your watering.

## Meet the App Home Screen

4

## Initial Smart Life App Setup

### 1) Download the Smart Life App

If you don't already have the Smart Life App on your smart device, search for "Smart Life" and download the free Android or iOS app.

### 2) Open the Smart Life App

Create an account or login with an existing account to begin timer setup.

### 3) Enter configuration Mode

Long press the ON/OFF button for 5S, the lights flash quickly (twice /1s), enter the pairing mode

### 4) Add a Device

Turn on your mobile phone's bluetooth. Click "Auto Scan", then add the water timer.

## Initial Water Timer Setup

### 1) Insert Two AA Batteries

Batteries are not included and you will need two alkaline AA batteries to power your timer. Remove the battery tray and install the batteries according to the drawings located in the tray. Firmly reinstall the battery tray back into the timer.

### 2) Install the Timer

Connect the timer to an outdoor hose faucet. Your timer is now ready to be used with any product that can be attached to a standard hose faucet.

**!** Do not place the timer in an underground valve box or anywhere your Bluetooth signal will be obstructed.

### 3) Turn on Your Water

The water must remain on for the timer to work properly.

## **Additional Water Timer Features**

### **Manual Watering**

Your timer has the ability to allow you to manually water without disturbing the programmed schedule. Manual is used to test equipment, run an extra watering cycle in an area, or to use the hose faucet without removing the timer. Press the on/off button to activate manual watering. Using the app you can set how long you want the preset manual cycle to run for. .

### **Stop Watering**

You can stop the flow of water at any time whether it is during manual watering, or during a programmed time. Press the on/off button once to stop watering.

## **Warm Tips**

When expecting freezing temperatures, timer should be removed from the faucet and stored indoors to avoid potential freeze damage. Please remember to clean the filter regularly and replace it if worn.

## **Troubleshooting**

Q: Why the bluetooth water timer didn't turn on/off at preset time?

A:

1. Programming is incorrect
2. Water pressure is too low
3. Particles of dirt or debris stuck in valve
4. More than one start time is programmed with overlapping schedules
5. Manual watering is on
6. Faulty valve
7. The faucet is off
