GETTING STARTED

1. Charging and Power On

Connect the USB Cable in the USB port to your camera, and plug in power (power adapter is not included in the package, we recommend 5V power adapter). The light of status indicator is red when it is charging. After the camera is charged, you need to turn on the power switch first and then long press the ⏻ to start, and the light will turn blue when it is working.

★ **Tip:** The charge must be used by adults or under the monitor of adults.

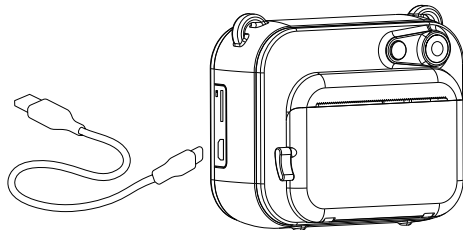

2. Install Memory Card

If you want to save the photos and videos you take, please make sure you have inserted a microSD card in the slot (max support 32GB microSD card). After the memory card is inserted, notice the sign changes on the screen.

Without a memory card inserted, this camera can only take photo and print it instantly.

Before inserting microSD card

After inserting the microSD card
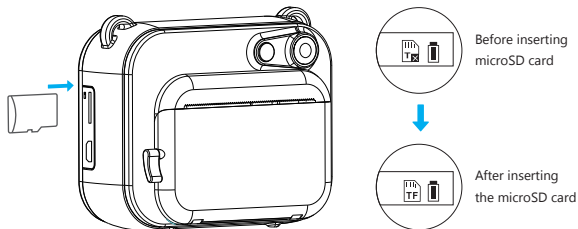

3. Install Print Paper

Pay attention to the installation direction of the paper. While closing the lid, make sure 5-cm print paper is out of the lid.
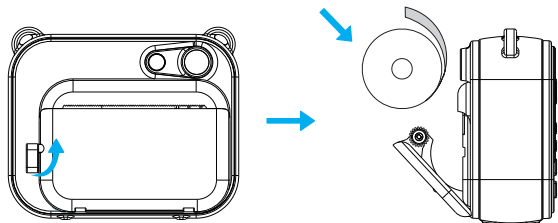

4. Switch Photo/Video/Playback Mode

When the camera is on, long press the 📷 button to change modes:
Photo Taking, Video Taking and Playback.

① Photo Taking Mode

Enter the Photo Taking Mode.

When you power on the camera, it is automatically under the Print Camera Mode, press OK button to select the Print Camera Mode or Normal Camera Mode.

Press 📷 button to take photos, and the photos will be printed automatically if it is under the Print Camera Mode.
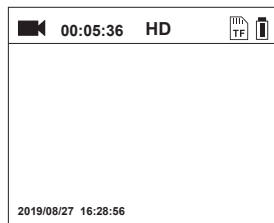

Press △ and ▽ button to select the photo frame.

Print Camera Mode   Normal Camera Mode

② Video Taking Mode

Enter the Video Taking Mode.
