## G60 Gaming Keyboard

### Keycap Puller

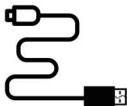

### USB Type-C to A Cable

# Wired Connection

+

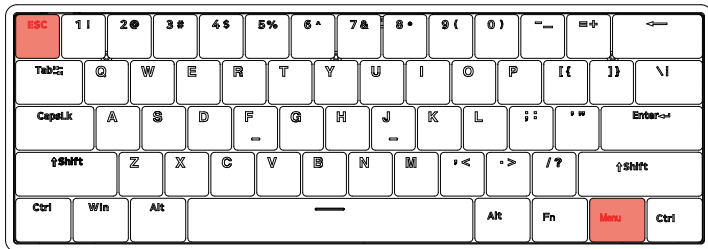

+

For the devices with USB Type-A ports (Personal PC, for example.)

You can connect the keyboard to the device with the cable in the package directly.

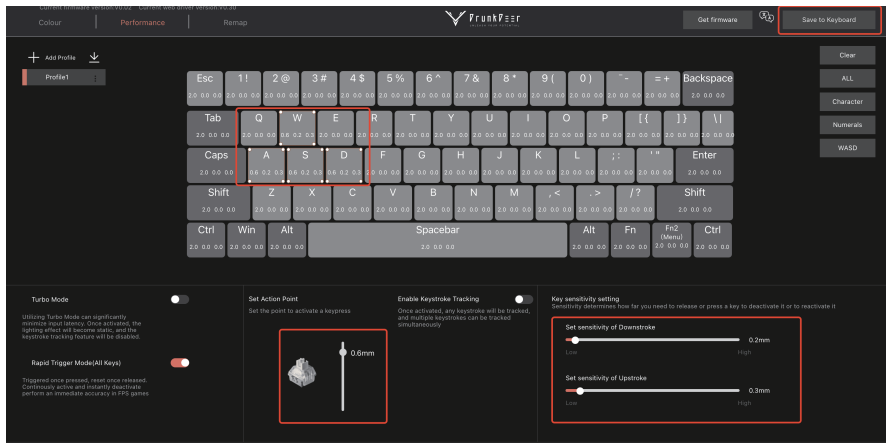

# How To Restore The Keyboard To Default Settings

You can restore the keyboard by key combination  
**'Menu+ Esc'** for **5** seconds.

The backlight will blink red for 3 seconds  
and the keyboard will return into its default state.

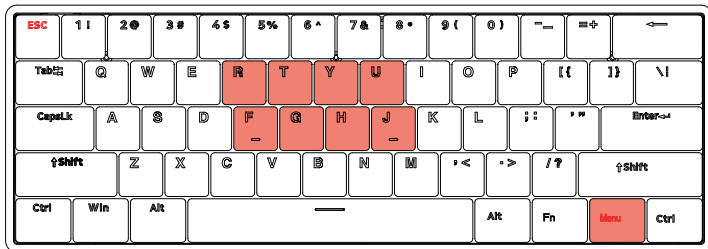

# How to Adjust the Actuation Sensitivity in DrunkDeer Antler

After you select the key you want to adjust the sensitivity of, drag the white dot to select the point you want the key to be triggered, then click the "Save to keyboard" button to save it.

Don't forget to save after adjusting the certain keys.

## Specification

Model Name: G60

Product Size: 292.5\*102.3\*43.1MM

Product Weight: 527 ± 20 g

Layout: ANSI 60%

Main Material : ABS(Housing); Silicon(Pad feet)

Switch Type: Magnetic Switch Linear

## **Caution**

**Please DO NOT place the keyboard in a high-temp or strong magnetic environment.**

**We DO NOT recommend disassembling or modifying this keyboard.**

**Due to the characteristic of magnetic switches, abnormal environments such as strong impact, high temperature, and strong magnetic fields may cause the keyboard to malfunction.**

**The switches can be disassembled or replaced with each other, lubed, or replace the spring. Each keyboard is individually calibrated for precision before leaving the factory.**

**The behavior described above may have a slight impact on individual key press precision.  
(Does not affect normal use)**
