# Ornament Printable

## You'll need:

3 inch blank ornament

Ribbon

Tape

Leftover Paint

Paint Brushes

Cup of water

Rag or towel

Cotton swabs

Ornament blanks can be found at your local craft store or online!

For this project we used leftover paint from the Poppies in Vase Kit, but feel free to use any paint combination you have on hand! Just make sure to assign a number for each color to make it easy to follow the numbered guide.

## Instructions:

This ornament printable makes a great afternoon activity for adults and kids alike! An easy project that any artist can do, just follow the directions below and you'll be on your way to making cute ornaments in no time!

**Step 1:** Get your workspace ready. Set out paint, paper towels, q-tips, water, a #2 pencil, tape, and an object to paint.

**Step 2:** After printing, cut apart the sections on the next page. The numbered outline will be your template. Cut this off so it can be taped to your ornament after this step. Flip over the template piece and cover the entire back of it with pencil, making sure you get even coverage.

**Step 3:** Flip the paper back over and place on the ornament you will be painting, tape in place. Then trace over the lines of the template outline using firm pressure. Check to make sure the lines have all been traced before removing the tape.

**Step 4:** Once you have traced your lines you are ready to paint! Use the numbered guide to fill in the spaces. Use light coats and short brush strokes. \*

**Step 5:** Paint a second coat as needed. Use your 8th paint color to paint the edges of your ornament for a little extra definition. Check that all spots have been painted and remember you can leave off the year and put a name or holiday greeting there instead!

**Step 6:** Let your ornament dry, thread a ribbon through the hole, and it's ready to hang or gift! These make great personalized gifts for family and friends!

\* Use your q-tips to help clean up any mistakes by wetting one end and using it to wipe up the paint. Use the dry end to help dab up any excess water. Toothpicks can be used to stir the paint in your paint pot, and aprons are optional as well!

# Ornament Printable

# Project Complete!

Please tag us on any social media posts featuring your ornaments, we love to see what you create! Just use any of the account names for our social media accounts below.

If you're interested in more DIY projects, painting tips and tricks, please follow us on Youtube, Instagram, Facebook, Tik Tok, or Pinterest! We post content regularly and love to feature finished pieces from our customers!

We hope you had fun doing this project!
