Sample **Purple Tangie**

Sample ID SD230325-018 (71176)	Matrix Concentrate (Inhalable Cannabis Good)
Tested for Exodus hemp	
Sampled -	Received Mar 24, 2023
Analyses executed QARUSH, CANX	Reported Mar 28, 2023

Laboratory note: The estimated concentration of the unknown peak in the sample is 8.92%. Currently PharmLabs laboratory can not confirm an unidentified peak in your chromatogram due to interference (only with highly concentrated D8 products) from which we believe to be either (+)8-THC or d9-THC. At this time there are no reference standards available for (+)8-THC. (+)8-THC is a different compound from the main (-)8-THC cannabinoid and, therefore, these two compounds may have different efficacies. Using the most advanced instruments and techniques available, the separation of (+)8-THC and d9-THC is problematic for the scientific community as a whole. PharmLabs believes the unidentified peak to be a combination of (+)8-THC and d9-THC with the majority, if not all, of the concentration being (+)8-THC. Total (+/-) D8 Concentration is estimated to be: 79.90%
