**ALWAYS THE BEST.**

**ALWAYS SILKY.**

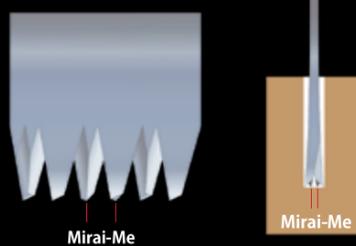

**EXTRA LARGE**
**LARGE**

**NON-SET TEETH**

The blade is taper ground to reduce resistance giving smoother, easier, faster cutting performance.

**MIRAI-ME**

The blade has 4 cutting angles along its length. It leaves a smooth surface after cutting and can rip-cut, cross-cut and slant-cut.

**IMPULSE-HARDENING**

The teeth of the blades are heated instantly and hardened and stay sharp about three times longer than non-hardened teeth.

**4-RETSUME**

For cross-cutting, rip-cutting and slant-cutting. Cuts in all directions. When the grain of the wood is longways, the saw cuts smoothly at the point where the branch joins.

**SHARPENABLE**

The blade can be sharpened with a file.

**HARD CHROME PLATING**

Hard chrome plating produces an exceedingly high durable surface and is resistant to rust and the effects of resin.

**ELECTROLESS NICKEL PLATING**

New Electroless Nickel Plating coating process allows the entire blade, even the teeth, to be coated. This provides superior wear and rust resistance for improved cutting performance and extended blade life.

**RUBBER HANDLE**

The rubber handle is comfortable to hold, reduces vibration and offers superior grip when hands are wet or cold when wearing gloves.

**GENKI GRIP**

The non-slip rubberized grip absorbs vibration and directs more usable energy to the cutting edge. The screwless grip requires no tools for changing the blade.

**RUBBER JACKET**

Light and comfortable rubber grip with rigid aluminum chassis.

**3D-ROLLER USPAT. 9,821,481**

The three rollers provide a smoother action when inserting the saw in the sheath from any angle. The tri-roller system includes a locking mechanism that prevents the saw from accidentally falling out.

**FPA-ANERKANNT**  
 FPA-approved in Germany

**SUGOWAZA Professional**

Mono constructed blade runs all the way through the handle, eliminating stress and breakage.

Item#	Blade length mm/in	Teeth Per 30mm/in	Weight (g)	Kerf (mm)
419-42	420/16.5	6.5/5.5	710	1.5

**SUGOI Professional**

Best-selling, state-of-the-art, professional hand saw with a razor sharp curved blade for greater cutting speed with less effort. All sizes have progressive teeth for a smooth start and powerful, productive finish to each stroke.

Item#	Blade length mm/in	Teeth Per 30mm/in	Weight (g)	Kerf (mm)
390-33	330/13	5.5-6.5/4.7-5.5	580	1.7
390-36	360/14.2	5.5-6.5/4.7-5.5	660	1.7
390-42	420/16.5	5.5-6.5/4.7-5.5	600	1.7

**TSURUGI CURVE Professional**

An aggressive blade which will still fit into tight crotches without damage to opposing limbs. The TSURUGI delivers perhaps the lightest weight, best balanced "big saw" ever produced.

Item#	Blade length mm/in	Teeth Per 30mm/in	Weight (g)	Kerf (mm)
454-33	330/13.0	7.5/6.4	460	1.6

**ZÜBAT Professional**

This best-selling tool delivers a professional, heavy-duty, mono-constructed blade which provides greater cutting speed with less effort.

Item#	Blade length mm/in	Teeth Per 30mm/in	Weight (g)	Kerf (mm)
270-33	330/13.00	7.5/6.4	495	1.4

**FOLDING SAWS / 折りたたみ鋸**

**BIGBOY 2000 Professional**

The large, multi-purpose BIGBOY folding saw is every outdoor worker's dream. With its 14.2-inch blade and rubber-cushioned handle, you'll have all the cutting power you need at your fingertips.

Item#	Blade length mm/in	Teeth Per 30mm/in	Weight (g)	Kerf (mm)
356-36	360/14.2	6.5/5.5	440	1.7

**GOMBOY CURVE Professional**

With refined Japanese cutting technology and fitting a myriad of applications, it's not surprising that the GOMBOY Professional is Silky's #1 selling saw worldwide. Whether building, woodworking, camping, or work-around-the yard, the GOMBOY is the saw for you.

Item#	Blade length mm/in	Teeth Per 30mm/in	Weight (g)	Kerf (mm)
717-21	210/8.3	8/6.8	235	1.3
717-24	240/9.5	8/6.8	265	1.3
717-30	330/11.8	8/6.8	300	1.4

**POCKETBOY CURVE Professional**

Compact lightweight folding saw with 5-inch blade that will take up very little room in your pocket or backpack. Nicknamed as "Little Giant" due to its extraordinary cutting capacity.

Item#	Blade length mm/in	Teeth Per 30mm/in	Weight (g)	Kerf (mm)
