PROFESSIONAL GRADE CLIMBING ROPES & HARDWARE FOR WORKING AT HEIGHT

WHO WE ARE

With over 40 years of rope-making experience, Pelican Rope offers high-quality and groundbreaking ropes, lanyards, and rope assemblies. When you demand the ultimate in high-performance climbing gear, U.S. Rigging's ProClimb® line delivers unsurpassed quality. Together, we offer a comprehensive line of arborist gear with unmatched quality and superior craftsmanship.

The products displayed in this catalog are intended for professional use only.

Tree care, especially while performed elevated above ground level is inherently dangerous, and can lead to serious injury or death. Neither Pelican Rope nor U.S. Rigging Supply are responsible for accidents that may occur resulting from the use or misuse of any product.

All rope, rope assemblies, and hardware intended for work positioning, climbing, or fall protection must be inspected daily by the climber and used only for his or her personal safety. Rigging products must never be used for climbing or work-positioning.

The equipment in this catalog is provided with the consideration that the user is highly knowledgeable with the application and proper use of said equipment. Written content expressed in this catalog are designed to advertise the products offered; they are not intended as instructions or as replacements for actual training. Proper training and instruction on the use of the items purchased from this catalog are the sole responsibility of the user.

Rope Terms

Abrasion Resistance - The capacity of a fiber or cordage to resist erosion and breaking due to friction against other fibers or rope components or a contact surface which can be a piece of the rope itself.

Construction - The way in which the fibers of the rope are formed, twisted, intertwined, or braided together. Popular constructions include: static kernmantle, double braid, solid braid, and hollow braid.

Core - An important component of rope that can be constructed of either fiber or wire. The purpose of the core is to reinforce the outer strands, or cover, and to prevent them from bearing down against one another.

Cover - The outermost layer of synthetic fibers used to construct the basis of a rope.

Creep - The length or rate at which the synthetic fibers in the rope elongate irrevocably over a period of time.

Minimum Breaking Strength (MBS) - The lowest acceptable load that would be expected to break or split a single fiber strand in a tensile test conducted under a specified procedure for a specific rope product.

Spliced - The fusing of two ends of rope strand or cordage by interweaving or inserting these ends into the body of a product.

Torque - The twisting force that synthetic rope or cordage exerts when tensioned. Key components of a rope's torque characteristics are the number of strands and lay direction.

ROPE

Our engineers have assembled an arsenal of climbing ropes you can trust. From lightweight Technora® lines to our legendary zero-milking 24 strand Tree Viper™, our ropes are redefining industry standards.

The secret to our rope is simple - innovation. For over the past 40 years, our mission has been to build rope that amplifies industry standards. After all, we're "the most trusted name in rope".

- THE PELICAN ROPE TEAM

CLIMBING

ARBORIST-16™

Family Code: 4AR-16

16 Strand Arborist Rope

This high-strength composite climbing rope features a tough 16 strand braided chemical resistant polyester cover over a non-rotational nylon parallel core. This construction results in a smooth running rope ensuring fewer snags and minimal abrasion. Its 16 strand weave is steam set which helps to eliminate cover over core slippage.

Benefits & Features

- Full 1/2" Diameter
- Firm Construction
- High Visibility
- Low-Stretch
- Flexible

CONSTRUCTION: 16 Strand
COVER: Polyester
CORE: Nylon

Eye Options:

THIS GEAR
In Action

Family Code: 4A-15LY15

24 Strand Climbing Rope

The Tree Viper™ is a unique hand-spliced 24 strand rescue rope. This rope looks great, and provides easy knotability and zero milking. The bright colors of the rope ensure excellent visibility.

The incredibly strong cover of this climbing rope runs smoothly over sheaves, providing reduced drag through gears for faster ascending and finer control while descending. The nylon core holds better and stronger knots, due to its stretch and texture.

The double-ply braid features abrasion and chemical resistant polyester cover over a strong nylon. The polyester cover provides excellent UV protection, high abrasion resistance, and unmatched durability.

Benefits & Features

- ✔ Designed for Rigorous Climbing
- ✔ Abrasion & Chemical Resistant
- ✔ Exceptional Feel in Climbing
- ✔ Reduces Hand Cramping
- ✔ Smooth but Tough Cover
- ✔ Zero Milking

STATIC MASTER II™

The Static Master II is made with a unique 32 strand construction giving it more flexibility than the original Static Master™. We use a two-twill pattern on our braided strands to provide a silk-like running sheath. This incredibly smooth rope provides reduced drag through gears for faster ascending and finer control while descending.

FIRESHIELD-T™

Family Code: 2TT / 2TP

Technora® Fire Escape Rope

Our 100% Technora® escape rope is one of the most heat-resistant ropes on the market, making it optimal for search and rescue operations. The FireShield-T has a static kernmantle construction and resists heat up to 930° F with a loss of strength at 500° F. This high-strength, low-stretch rope is UL and NFPA 1983-2017 certified as well as a top choice for fire fighters and rescue workers.

Benefits & Features

- ✔ Flexible & Supple for Compact Storage
- ✔ Works with Descending Devices
- ✔ Great Abrasion Resistance
- ✔ Extremely Durable

CONSTRUCTION: Static Kernmantle
COVER: Technora®
CORE: Technora® or Polyester

Eye Options:

Sewn Eye (SNE)

FIRESHIELD-K™

Family Code: 2KK

Kevlar AP® Fire Escape Rope

This 100% Kevlar AP® rope is similar to the Technora® Fire Escape rope. The FireShield-K is heat resistant up to 930° F with a loss of strength at 500° F. It's also UL and NFPA 1983-2017 certified which meet vital requirements for safety operations.

Benefits & Features

- ✔ Works Well with Descent Devices
- ✔ Good Abrasion Resistance
- ✔ Lightweight
- ✔ Flexible

ESCAPE PRO™

Family Code: 2WP24

Personal Escape Rope

Pelican's personal escape rope is formed with a durable kernmantle construction that is produced with a strong polyester cover over shock absorbing nylon core. Although ideal for rescue operations, its smaller diameter and high tensile strength is ideal for individual use. This escape rope is UL and NFPA 1983-2017 certified.

Benefits & Features

- Works Well with Descent Devices

RESCUE LIGHT™

Dyneema® Climbing Rope

Originally developed for mountain rescue teams and canyoneering, Pelican's Dyneema® low angle rescue rope ensures superior strength and dependability in the most adverse conditions. The highly visible orange and yellow polyester cover provides excellent abrasion resistance, while its Dyneema® core provides superior tensile strength and is extremely lightweight.

CANYON LIGHT™

Built tough for canyoneering, our versatile Canyon Light™ is designed for rigorous and abrasive conditions. Constructed with a Poly-Technora® cover and Dyneema® core, this canyoneering rope offers a thicker, tougher sheath and tighter weave than climbing ropes. Its low-stretch, static nature delivers increased control while descending.

TECHNORA® PRUSIK LINE

Family Code: 1S-T

Heat Resistant Prusik Cord

This Technora® over nylon core rope is the original high-strength, non-melting prusik line. Technora® is eight times stronger than steel and highly resistant to heat, acids, alkalis and organic solvents and is also not vulnerable to damage caused by steam or sea water.

Benefits & Features

- ▽ Long-Lasting Prusik
- ▽ Abrasion Resistant
- ▽ Heat Resistant

LOAD PRO™

Family Code: 1AP

The #1 Load Rope in the U.S.A.

Designed for use in cable pulling, this highly versatile rope combines low-stretch with high-strength. This load line also offers dependability and unsurpassed resistance to abrasion, sunlight and common chemicals. It has a melting point between 489-500° F and a loss of strength between 244-250° F.

Our optional Pelican Tuff™ urethane coating penetrates the fibers of the outer cover providing additional protection to the inner core while increasing abrasion resistance.

Benefits & Features

- ▽ Balanced Core & Cover Design
- ▽ Abrasion Resistant
- ▽ High-Strength
- ▽ Torque-Free
- ▽ Chafe Guard
- ▽ Low-Stretch

CONSTRUCTION: Double Braid
COVER: Polyester
CORE: Polyester

Eye Options:

Spliced Eye (SE)

Spools include a 6" eye splice each end with chafe guard. Pelican Tuff™ urethane coating available upon request.

Family Code: 4N

High-Force Cable Pulling Rope

With shock absorption properties and a higher tensile strength than both nylon and polyester, this versatile rope offers unmatched dependability. This high-performance, high-force cable pulling rope provides even-balance and unsurpassed quality and performance.

Our optional Pelican Tuff™ urethane coating penetrates the fiber of the outer cover - providing additional protection of the inner core while increasing abrasion resistance.

Benefits & Features

3 STRAND NYLON

Family Code: NY

Nylon 3 Strand Twist Rope

Pelican's 3 strand nylon cord is an effective, all-purpose shock absorbent rope. Its high-strength and elasticity are recommended for securing boats and cargo. This 3 strand is resistant to abrasion, sunlight, rot, mildew and many common chemicals.

Benefits & Features

- Great Abrasion Resistance
- Rot and Mildew Resistant
- Excellent Strength
- Shock Absorbent
- Economical

CONSTRUCTION: 3 Strand
COVER: Nylon

Eye Options:

Spliced Eye (SE)

Available in 600' & 1,200' spools.

3 STRAND POLYESTER

Family Code: PE

Polyester 3 Strand Twist Rope

Pelican's 3 strand polyester rope offers excellent durability while maintaining strength. With lower stretch than nylon, this polyester 3 strand offers resistance to abrasions and UV rays. Also, it is resistant to rot, mildew and a variety of fluids and chemicals. This rope is well-suited for marine and industrial applications.

Benefits & Features

- Great Abrasion Resistance
- Rot and Mildew Resistant
- Superior Heat Resistance
- Excellent UV Resistance
- Low Elongation
- High-Strength
- Economical

CONSTRUCTION: 3 Strand
COVER: Polyester

Eye Options:

Spliced Eye (SE)

RIG MASTER™

Family Code: PD

3 Strand Composite Rope

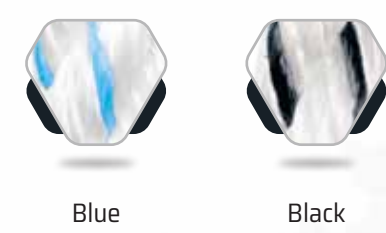

Pelican's 3 strand composite rope has the durability required for the job, while remaining lightweight and allowing for a comfortable grip. It also offers excellent energy absorption and abrasion resistance.

Benefits & Features

- ✔ Very Little Water Absorption
- ✔ Easy Handling & Splicing
- ✔ Color-Coded by Strength
- ✔ Lightweight but Strong

CONSTRUCTION: 3 Strand
COVER: Polyester
CORE: Polypropylene

Color-Coded by Diameter:

S-12™ SYNTHETIC STAINLESS

12 Strand Honeywell Spectra®

Like stainless steel, our synthetic stainless rope is hydrophobic; meaning that it will not absorb water or corrode. This rope has excellent chemical and abrasion resistance, and exceptional flex fatigue.

The S-12 Synthetic Stainless Rope can float and maintains strength even in freezing temperatures. It provides an excellent low temperature performance with a melting point at 300° F and loss of strength at 150° F.

Benefits & Features

- ✔ Extremely High-Strength
- ✔ Good Flex Fatigue
- ✔ Very Low-Stretch
- ✔ Floats on Water
- ✔ Easy to Splice
- ✔ Torque-Free
- ✔ Low Creep

CONSTRUCTION: 12 Strand
COVER: Honeywell Spectra®

Eye Options:

Spliced Eye (SE)

D-12™

Family Code: 7D

12 Strand Single Braid - Dyneema®

This high performance rope is an excellent wire rope replacement for industrial and utility applications. Unaffected by oil and common chemicals, this high-strength, very low-stretch rope is easily spliced. The D-12™ also exhibits low flex fatigue, has nearly zero creep, and excellent abrasion resistance.

Dyneema® is pound for pound stronger than steel and additional protection is provided by our Pelican Tuff™ urethane coating. Professionally hand spliced eyes and chafe guards are available on request. Break strength remains constant in wet or dry conditions making this the perfect choice for mooring, towing lines, winch lines, yachting lines, and commercial fishing ropes. With a specific gravity of .98, this rope floats. It has excellent low temperature performance with a melting point at 300° F and loss of strength at 150° F.

Benefits & Features

- ▼ Pelican Tuff™ Urethane Coated
- ▼ Steel Cable Replacement
- ▼ Extremely High-Strength
- ▼ World's Strongest Fiber
- ▼ UV Resistance Coating
- ▼ Good Flex Fatigue
- ▼ Floats on Water
- ▼ Easy to Splice

CONSTRUCTION: 12 Strand
COVER: Dyneema® SK-75 or SK-78

Eye Options:

Spliced Eye (SE)

P-12™

Family Code: 7PE

12 Strand Single Braid - Polyester

This versatile high tenacity rope offers the lowest stretch of all polyester ropes. The quality of construction provides a torque-free rope, eliminating kinks and hockles. This 12 strand single braid provides easy and convenient in-the-field splicing to save time while on the job. The P-12 has a melting point between 489-500° F with a loss of strength between 244-250° F.

Our optional Pelican Tuff™ urethane coating penetrates the fibers providing additional UV protection and increased abrasion resistance. Eyes are professionally hand-spliced at both ends along with an optional polyester chafe guard. This is highly recommended for utility pulling and stringing applications, winch lines, rope slings as well as arborist climbing and rigging assemblies.

Benefits & Features

- ▼ UV Resistance Coating
- ▼ Abrasion Resistance
- ▼ Easy to Splice
- ▼ Torque-Free
- ▼ Low-Stretch

Pelican Tuff™ urethane coating available upon request.

LANYARDS & ASSEMBLIES

The background is a vibrant orange with a subtle, painterly texture. On the left, a worker in a grey shirt, black pants, and a white helmet with a headlamp is perched on a dark, vertical tree limb. They are wearing a safety harness and holding a rope. Scattered around the worker are several pieces of climbing equipment: a blue and black rope with a silver carabiner at the top, a yellow and black rope with a silver carabiner at the top right, an orange rope with a silver carabiner in the middle, and a thick blue and red braided rope at the bottom right. The overall composition is dynamic and emphasizes the use of high-quality climbing gear.

Pelican's rope assemblies and lanyards are lightweight, easy-to-handle, and spliceable. From heavy-duty flip lines to our groundbreaking Bulldog™ Technora® Prusik, our engineers continue to excel and exceed our customers' expectations.

Our passion is fueled by a commitment to you, our customer. We continue to reach out, engage, and listen to your feedback. Our team won't rest until we honor your needs. It's a promise that Pelican has made to our industry and will continue to keep that promise for as long as our doors are open.

- THE PELICAN ROPE TEAM

SENIOR

UTILI-TREE™ FLIP LINE

Family Code: LYKM

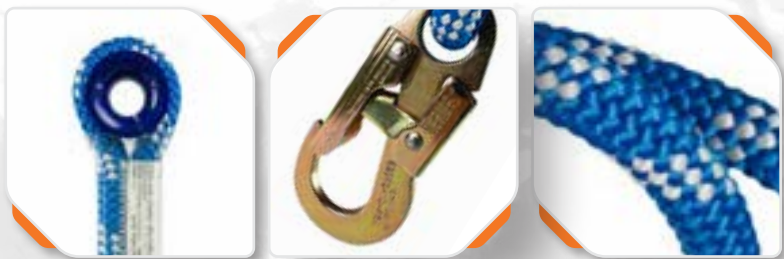

This versatile non-wire core flip line is the ideal solution for arborists working near electrical hazards where wire core flip lines are not an option.

If you work at high altitudes in trees or on utility lines, this flip line is the right fit. Our Pelican Tuff™ urethane coating helps to protect against UV rays and abrasion while the revolutionary ProClimb® Better Grab™ removable rope grab helps you work smoothly without hesitation.

Benefits & Features

- ▽ Designed for High Altitude Work
- ▽ Can Be Used Near Power Lines
- ▽ Meets ANSI Z359.3/Z133-2017
- ▽ UV & Abrasion Resistant
- ▽ Optional Chafe Guard
- ▽ Non-Conductive Core

BERANEK LANYARD

Family Code: LYB

Originally developed by tree care pioneer Jerry Beranek, the Pelican Beranek Lanyard consists of a hand-spliced, double braid polyester rope with a double-locking safety snap hook at one end and a back spliced bitter end. The braided flip line is used with a prusik runner to complete the Beranek system. The forged steel safety snap hook is rated at 23 kN (5,000 lbs) and enforced with a plastic round thimble.

Benefits & Features

- Developed by Arborists
- Low-Stretch
- Durable

CONSTRUCTION: Double Braid
COVER: Polyester
CORE: Polyester

SKU	Ø

Available lengths: 8', 10', and 12'.

CHAINSAW LANYARD

Family Code: LYB

This chainsaw lanyard is designed with a brass swivel snap that is swaged onto a 3.5' length of 1/4" diameter kernmantle line and a 10" loop. The lanyard can be hitched to a saw handle by placing the snap end through the loop to form a hitch at the other end to attach to your saddle. This allows for complete control of the chainsaw even while falling below the climber's feet when accidentally dropped.

WT.	2.5 oz	

BACK-UP FALL ARRESTER W/ CARABINER

ITEM CODE	KNG-802	▽ Aluminum Alloy
ROPE SIZE	Ø 10 mm to Ø 12 mm	▽ Stainless Steel
WT.	7.2 oz	

RESCUE SWIVEL

- ▽ Aluminum Alloy
- ▽ NFPA 1983-G
- ▽ Ball Bearing
- ▽ Anodized

ITEM CODE	USR-DSL-AN
MBS	40 kN
LENGTH	108 mm
WT.	5.6 oz

ALUMINUM EYE-TO-EYE SWIVEL

- ▽ Aluminum Alloy
- ▽ Ball Bearing
- ▽ Anodized

ITEM CODE	USR-DSR
MBS	22 kN
LENGTH	83.5 mm
WT.	3.2 oz

FORGED ALUMINUM EYE-TO-EYE SWIVEL

- ▽ Aluminum Alloy
- ▽ Ball Bearing
- ▽ Anodized

ITEM CODE	USR-DSL-A
MBS	40 kN
LENGTH	108 mm
WT.	5.6 oz

STEEL FIXED-EYE SNAPHOOK

- ▽ Zinc-Plated, High-Tensile Steel
- ▽ Double Action Gate
- ▽ ANSI Z359.12-2009

ITEM CODE	USR-01-CF09B
GATE	16 kN Ø 20 mm
MBS	↔ 23 kN
WT.	10.3 oz

STEEL SNAPHOOK W/ FIXED-EYE

- ▽ Zinc-Plated, High-Tensile Steel
- ▽ Double Action Gate
- ▽ ANSI Z359.12-2009

ITEM CODE	USR-01-CF07
GATE	16 kN Ø 29 mm
MBS	↔ 45 kN
WT.	12.2 oz

FORGED STEEL SNAPHOOK W/ FIXED-EYE

- ▽ Zinc-Plated, High-Tensile Steel
- ▽ Double Action Gate
- ▽ ANSI Z359.12-2009

ITEM CODE	USR-01-CF09
GATE	16 kN Ø 22 mm
MBS	↔ 23 kN
WT.	12.6 oz

STEEL FIXED-EYE SNAPHOOK

- ▽ Zinc-Plated, High-Tensile Steel
- ▽ NSN 5340-01-157-6088
- ▽ Double Action Gate

ITEM CODE	USR-01-CFE
GATE	Ø 18 mm
MBS	↔ 23 kN
WT.	10.4 oz

STEEL FIXED-EYE SNAPHOOK

- ▽ Zinc-Plated, High-Tensile Steel
- ▽ Double Action Gate
- ▽ ANSI Z359.12-2009

ITEM CODE	USR-01-CFE9
GATE	16 kN Ø 20 mm
MBS	↔ 23 kN
WT.	10.2 oz

STEEL SWIVEL SNAPHOOK

- ▽ Zinc-Plated, High-Tensile Steel
- ▽ Double Action Gate
- ▽ ANSI Z359.12-2009

ITEM CODE	USR-02-CS09B
GATE	16 kN Ø 21 mm
MBS	↔ 23 kN
WT.	16.9 oz

STEEL SWIVEL SNAPHOOK

- ▽ Zinc-Plated, High-Tensile Steel
- ▽ Double Action Gate

ITEM CODE	USR-02-CSE
GATE	Ø 19 mm
MBS	↔ 23 kN
WT.	13.6 oz

STEEL SWIVEL SNAPHOOK

- ▽ Zinc-Plated, High-Tensile Steel
- ▽ Double Action Gate
- ▽ ANSI Z359.12-2009

ITEM CODE	USR-02-CS07
GATE	16 kN Ø 27 mm
MBS	↔ 50 kN
WT.	17.8 oz

ALUM. FIXED-EYE SNAPHOOK

- ▽ Anodized Aluminum Alloy
- ▽ Double Action Gate

ITEM CODE	USR-50-(AB)(AR)(ABK)
GATE	Ø 19 mm
MBS	↔ 27 kN
WT.	5.7 oz

RED BARON SNAPHOOK W/ FIXED-EYE

- ▽ Anodized Aluminum Alloy
- ▽ Double Action Gate

ITEM CODE	USR-40-A
GATE	Ø 22 mm
MBS	↔ 27 kN
WT.	5.0 oz

FORGED ALUM. SNAPHOOK

- ▽ Anodized Aluminum Alloy
- ▽ Double Action Gate
- ▽ ANSI Z359.12-2009

ITEM CODE	USR-59-AY
GATE	16 kN Ø 26 mm
MBS	↔ 23 kN
WT.	8.9 oz

TANGO FIXED-EYE SNAPHOOK

- ▽ Anodized Aluminum Alloy
- ▽ Double Action Gate
- ▽ Keylock

ITEM CODE	KNG-715-BLK
GATE	↔ 15 kN Ø 26 mm
MBS	↔ 33 kN ↔ 10 kN
WT.	4.6 oz

FORGED ALUM. SWIVEL SNAPHOOK

- ▽ Anodized Aluminum Alloy
- ▽ Double Action Gate
- ▽ Keylock

ITEM CODE	USR-1455-ABK
GATE	Ø 26 mm
MBS	↔ 28 kN
WT.	6.5 oz

ALUM. SNAPHOOK W/ FIXED-EYE

- ▽ Anodized Aluminum Alloy
- ▽ Double Action Gate
- ▽ Keylock

ITEM CODE	USR-145-ABKU
GATE	Ø 25 mm
MBS	↔ 40 kN
WT.	4.4 oz

ALUM. SNAPHOOK W/ FIXED-EYE

- ▽ Anodized Aluminum Alloy
- ▽ Double Action Gate
- ▽ ANSI Z359.12-2009

ITEM CODE	USR-58-AB
GATE	16 kN Ø 25 mm
MBS	↔ 23 kN
WT.	10.7 oz

FAST-RUBBER ROPE FASTENER

- Universal Size

TREE CARE

All Tree-Guy™ systems install in less than half the time of conventional tree-staking devices; saving you time and labor cost.

Tree-Guy™ anchoring systems require little to no upkeep - install and forget. Minimal, if any, maintenance is required. If guy length adjustment is ever necessary, it can be done by one man in seconds, and without tools.

- U.S. RIGGING SUPPLY

TREE-GUY

TG-1

A complete tree support system. This gear includes:

- 13' Long Vinyl Coated Cable
- Patented Arrow Anchor
- Limit Springs
- Tree Collar
- Tensioner

Three complete assemblies in each kit.

TREE-GUY

TG-3G

A tree anchoring support system. This gear includes:

- 12' Long Tree-Tie Webbing
- Patented Arrow Anchor

Three complete assemblies in each kit.

TREE-GUY

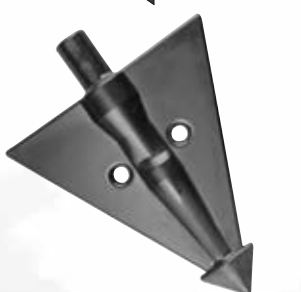

TG-5

A tree anchoring support system. This gear includes:

- 30" Long Wire Cable
- Patented Arrow Anchor
- Thimble Eye

Ten complete assemblies in each kit.

TREE-GUY

ARROW ANCHOR

The Patented Arrow Anchor. Black toughened nylon. Great holding power and easy to set. Arrow anchor only.

SKU | TG-ANCHOR

TREE-GUY

TG-2

A tree anchoring support system. This gear includes:

- 13' Long Vinyl Coated Cable
- Patented Arrow Anchor
- Tree Collar
- Tensioner

Three complete assemblies in each kit.

TREE-GUY

TG-4B-G

A tree anchoring support system with cam buckle. This gear includes:

- 12' Long Tree-Tie Webbing
- Patented Arrow Anchor
- Cam-Lock Adjuster

Three complete assemblies in each kit.

TREE-GUY

TG-6

A tree anchoring support system. This gear includes:

- 30" Long Vinyl Coated Cable
- Patented Arrow Anchor
- Thimble Eye

Ten complete assemblies in each kit.

TREE-GUY

TREE-TIE WEBBING

The Tree-Guy™ Tree-Tie is an eco-friendly, non-stretch webbing that's mildew resistant. Available in 150', 250', 500', & 1,500' lengths.

EXTRAS & ADD-ONS

A leader in arborist supplies, Pelican Rope is an expert on all things tree gear and arboriculture. From chafe guards to rope bags, we have you covered. Pelican has an array of extras and add-ons suited for novice and expert tree climbers alike.

- THE PELICAN ROPE TEAM

EXTRAS & ADD-ONS | CHAFE GUARD

TUBULAR CHAFE GEAR Family Code: CHF-TUB

Our most popular chafe protection, Chafe Master™ tubular chafe gear is very flexible which helps your rope to last longer and be replaced less frequently. Your hands and fingers will also appreciate the protection from cuts and scrapes!

SKU	FLAT WIDTH	INSIDE Ø	SKU	FLAT WIDTH	INSIDE Ø
CHF-TUB-67	1.18"	0.67"	CHF-TUB-1.57	2.60"	1.57"
