GETTING STARTED

STEP 1

Plug in Rejuvenate and wait until the status light pulses blue

STEP 2

Download the **Plantaform App** to connect Rejuvenate to the Internet!

Available on the **App Store**

GET IT ON **Google Play**

OR

Follow the instructions within the Plantaform User Manual for **"Manual Rejuvenate Control"** to use Rejuvenate offline
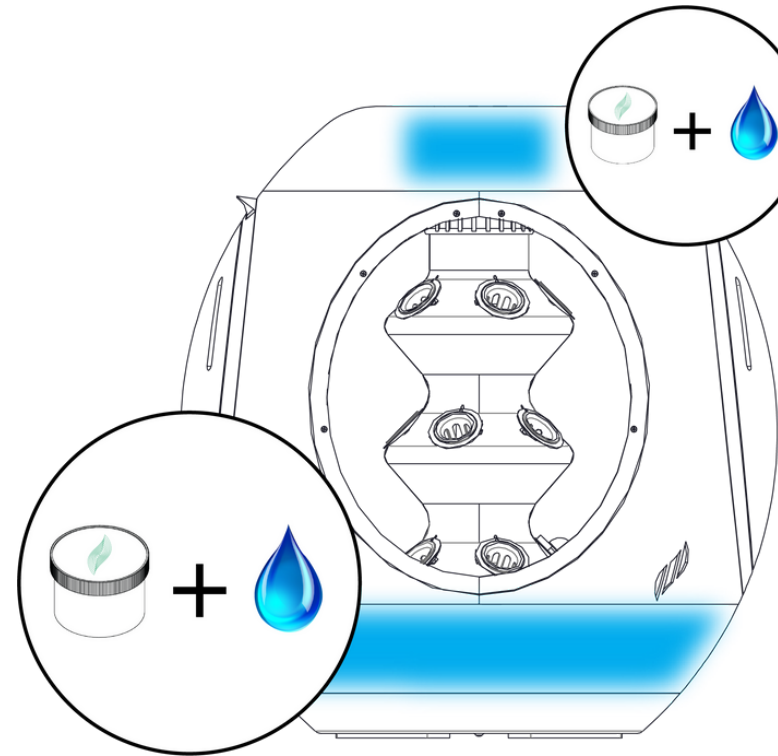

STEP 3

In the Plantaform App, tap on "**Start Setup**" and scan the QR code found inside your Pod Pack

Current Status:

START SETUP

Lights   Water   Plant Care

Progress   Cleaning   Assistance

STEP 4

Add water and nutrients to your Rejuvenate for the "**Initial Fill**"

Top Reservoir:
2g of Nutrients & **2L** of Water

**Bottom Reservoir:**
**3g** of Nutrients & **7L** of Water

STEP 5

Place all pods into your Rejuvenate after completing the **"Germination Instructions"** steps below:

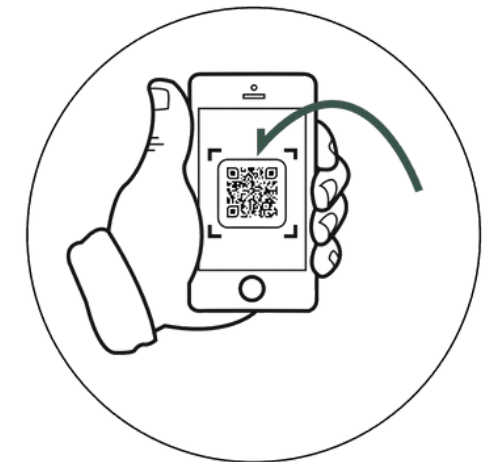

GERMINATION INSTRUCTIONS

Soak Pods in water for 5-10 seconds

Click on Pod covers and Germination domes
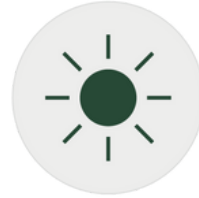

**Place Pods into Rejuvenate**

In the Plantaform App, scan the QR code located in the Pod Pack

STEP 6

Watch your Rejuvenate grow!

The **Plantaform Application** will notify you with notifications for:

Lights
Dim lights momentarily and modify lighting schedule

Water
Monitor water level and get help to refill your Rejuvenate

Plant Care
Information about plants growing, benefits, and growing tips

Progress
Estimated time until continuous/final harvest

Cleaning
Start a guided cleaning process

Assistance
Learn more about your Rejuvenate and other cultivars
