

RMT Distributor Highlight: Stellar Industrial

Stellar Industrial Supply is a privately held, premier industrial supplier. Stellar's specialists, sales force and customer experienced managers serve small, medium and large manufacturers, state and local municipalities, and commercial construction companies across the United States.

What truly sets Stellar apart from other industrial supply companies is their divisional approach to support their customers. Stellar operates through five divisions: Aerospace, Marine, Metalworking, MRO, and Safety Supply. Each division has its own product and market specialists. These specialists utilize specific industry and product knowledge to help customers receive the best value for the greatest profitability.

RMT looks forward to strengthening our relationship with Stellar Industrial and expanding their RMT tool offering in each of the separate divisions.

Manufacturing Days **P.1**

Have You Heard? **P.2**

Company Notes **P.3**

Manufacturing Days are a Success

Back in 2012, when Manufacturing Day began, U.S. manufacturing companies put forth the goal of changing the public's perception of manufacturing with the goal of inspiring more people to pursue manufacturing careers. These U.S. companies wanted to correct the idea that manufacturing involved repetitive, unskilled tasks that happened in dark, dirty factories – a ridiculous idea to anyone who has actually worked in manufacturing – and show people what manufacturing really looks like.

The fact is, today's manufacturing jobs are highly skilled. Not only that, but they take place in some of the most exciting, innovative work environments anywhere. As manufacturers seek to fill 4 million high-skilled, high-tech, and high-paying jobs over the next decade, MFG Days empowers manufacturers to come together to address their collective challenges so they can help their communities and future generations thrive.

Manufacturing companies across the nation open their facilities to the public

inviting students, teachers and community leaders to see what modern manufacturing looks like.

These events are intended to attract a larger workforce while showcasing to the public the high tech and the variety of skills and careers that are available to the next generation of individuals considering manufacturing. When individuals have a chance to experience modern manufacturing firsthand, their attitudes and opinions about the industry shift for the better.

This year, RMT had the largest participation for MFG Days by hosting over 200 students and teachers from 3 schools across the valley.

The attendees toured the facility, spoke with various departments, and were able to see the variety of career opportunities available at RMT.

RMT currently has job openings for machine operators & technicians, engineers, maintenance, administrative assistant, packagers, shipping, and material handlers.

Have You Heard?

Halloween is a celebration of all things spooky, and in the United States, most mark the start of Halloween with a carved-out pumpkin. Do you know how Jack o'lanterns came to be?

“Jack o’lantern” comes from the Irish legend of Stringy Jack. Legend has it that Stringy Jack invited the devil to have a drink with him, but Jack didn’t want to pay for the drink, so he convinced the devil to turn himself into a coin. Instead of buying the drink, he pocketed the coin and kept it close to a silver cross in his house, preventing the devil from taking shape again.

Jack promised to let the devil go as long as he would leave Jack alone for a year – and if Jack died, the devil wouldn’t claim his soul.

After a year, Jack tricked the devil again

to leave him alone and not claim his soul. When Jack died, God didn’t want such a conniving person in heaven and the devil, true to his word, would not allow him into hell.

Jack was sent off into the night with only a burning coal to light his path. They placed the coal inside a carved-out turnip and Jack has been roaming the earth ever since.

People in Ireland and Scotland began creating their own creations of Jack’s lanterns out of turnips, beets, and potatoes. The tradition traveled to the United States along with the immigrants and people began to use pumpkins, native to North America, for the lanterns instead.

According to the Guinness World Records, the highest number of lit Jack o’lanterns on display is 30,581 by the City of Keene, New Hampshire in 2013.

This Month’s Safety Tip

Halloween Safety

Children love Halloween because of the costumes and treats. But the holiday also brings serious safety risks. Kids are twice as likely to be hit by a car on Halloween as they are other nights of the year. Follow these safety tips to keep your kids safe!

Costume: 1) Choose bright colors and flame-retardant materials for costumes so that children can be seen by car headlights. 2) Attach reflective tape to his/her costume or treat bag. 3) Make sure the costume is the right size for your child to help eliminate tripping.

Masks: A mask can obstruct your child’s vision, especially if it slips out of place. Skip the mask and use nontoxic makeup instead.

Treats: Don’t let your child snack while he/she is trick-or-treating. Feed your child an early meal before heading out and inspect the treats before your child eats them. Discard anything that’s not sealed, has torn packaging or looks questionable. If you have young children, weed out the gum, peanuts, hard candies, and other choking hazards.

Employee Spotlight Jennae Bowen

Jennae Bowen was working in the cafeteria at St. Luke Hospital in Ronan prior to joining the RMT Team a few months ago. Jennae currently works as the RMT Kitchen Coordinator. Yes, she is responsible for the homemade, not out of a box, delicious food we get to eat every day! As the Kitchen Coordinator Jennae is responsible for planning out the RMT Lunch menu, ordering all the kitchen items, and cooking for over 200 RMT employees. Jennae enjoys getting to cook for the entire RMT Team and seeing how happy and thankful everyone is that she is here! She loves making people smile through her cooking. When Jennae is not at work she enjoys spending time hiking or being outside with her boys and her dogs. She is also trying to master the art of baking bread. What you might not know about Jennae is that she is an avid collector of black & white spotted cows.

Thank you Jennae for being part of the RMT Team!
