

Premium Solid White Maple Drawers

A Drawer Box Worthy of Your Craftsmanship

*In addition to
premium maple,
drawers are available
in all domestic and most
imported wood species.*

Your premium quality cabinetry or case goods deserve a drawer box of equal quality. DBS Premium White Maple drawer boxes meet the benchmark your craftsmanship demands. Each drawer box is hand-crafted of select North American Maple that has been graded for color uniformity and blemish-free appearance. We utilize only choice sap woods in wider widths to produce drawer sides with minimal glue-ups. Drawer bottoms are cut from select Maple plywood and are available in your choice of 1/4," 3/8" or 1/2." Constructed with precision-cut English dovetails or doweled joinery, these drawers not only look good, but are built to last.

Each of these boxes is Forest Stewardship Council certified and contributes to LEED criteria for adhesives and interior finishes. Our UV pre-finish drawer boxes are the most durable wood finish system available and benefit the environment by emitting no volatile organic compounds.
