

# **iMettoS**® **Electric Salamander** Instruction Manual

Please read this instruction manual carefully before operating this equipment

## **General information**

### **Information about the instruction manual**

This instruction manual contains information about the installation, operation and maintenance of the device and should be consulted as an important source of information and reference guide. Awareness of the safety instructions and instructions for use in this manual will ensure the safe and correct use of the device.

In addition to the information given here, you should comply with any local Health and safety Controls and generally applicable safety regulations.

The instruction manual forms part of the product and should be kept near the device and easily accessible for anyone carrying out the installation, servicing, maintenance or cleaning.

### **Liability and Warrantees**

All the information and instructions in this manual take into account standard safety regulations, current levels of technical engineering as well as the expertise and experience we have developed over the years.

The instruction manual was translated with all due care and attention. However, we do not accept liability for any translation errors. The German version of this instruction manual is definitive.

If the delivery consists of a special model, the actual scope of delivery may differ from the descriptions and illustrations in this manual. This is also the case for special orders or when the device has been modified in line with new technology.

NOTE! Read this manual carefully and thoroughly before any operation of the device, and especially before turning it on! Manufacturer is not liable for any damages or faults caused by:

- violation of advice concerning operation and cleaning;
- use other than designed; - alterations made by user;
- use of inadequate spare parts.

We reserve the right to make technical changes for purposes of developing and improving the useful properties.

### **Safety**

This section provides an overview of all important safety aspects. In addition every chapter provides precise safety advice for the prevention of dangers which are highlighted by the use of the above mentioned symbols. Furthermore, attention should be paid to all pictograms, markers and labels on the device, which must be kept in a permanent state of legibility.

By following all the important safety advice you gain an optimal protection against all hazards as well as the assurance of a safe and trouble-free operation.

**WARNING!**

Any refitting, incorrect installation, adjustment and maintenance may cause property damage or personal injury. Please contact the supplier if user needs to adjust maintain it, all these should be done by trained special professionals.

**WARNING!**

For your safety sake, do not put or store any flammable liquid, gas or other objects around the product.

**WARNING!**

The case of this machine should be grounded for safety sake. Thank you for your cooperation.

## A. Structure

1. BOTTOM TRUNK    2. HEATING INDICATOR    3. TEMPERATURE CONTROLLER
4. POWER INDICATOR    5. OIL RECEIVE TRAY
6. STAINLESS DROP PLATE    7. ELEVATING HANDLE    8. TOP TRUNK    9. TOP PLATE
10. BACK TRUNK    11. BACK BOARD    12. POWER CORD    13. GROUNDING SCREW
14. RUBBER FOOT    15. BOTTOM PLATE

## B. Functions

1. Make sure of its high efficient heat energy downward can make special roast effect on the surface of food. And it has an ideal result of heating and cooking for dishes with crumbs or cheese.
2. Its handle can adjust the distance of the food and heating source on demand while roasting.
3. It is made of stainless steel and the drop plate can be pull out and be easy to be cleaned.
4. It is easy to operate by rising and falling and easy for maintenance.
5. ES-2800L has a temperature controller and a heating area; EB-600 and ES-5600L have two temperature controllers and two independent heating areas.

## C. Basic parameter

Name	SALAMANDER		
Model	ES-2800L	ES-4000L	ES-5600L
Dimension (mm)	450x450x500	600x450x500	800x450x500
Power supply	220-240V, 50/60Hz		
Power	2.8kW	4kW	5.6kW
Temperature controller number	1	2	2
Temperature range	50~300℃	50~300℃	50~300℃
Heating area (mm)	440x320	590x320	790x320

Distance of rising and falling	0~140mm	0~140mm	0~140mm
Weight	38.5KG	49KG	61KG

#### **D. Transportation**

This product should be handled carefully and should not be upside down to prevent from damage both outside and inside during transportation. The packaged machine should be put in a ventilated warehouse without causticity gas. If it needs to be stored in open air temperately, measurement against raining is needed.

#### **E. Precautions**

- 1.The voltage for using this product must be coordinated with the supplied voltage.
- 2.When installing ES-4000L and ES-5600L, the connected diagram must be with leakage protector and 3mm touched both-pole cut-out.
- 3.There is equipotential connector on the side board. Before using please connect it safely according to safety regulation.
- 4.Before using, user should check whether every connection is firm, voltage is normal and ground connection is safe.
- 5.Use wet towel containing non-corrosive cleanser for cleaning. Do not clean this product with a water jet to prevent from damaging with water leakage.
- 6.When using, do not put any objects on the top trunk, and do not shake the top trunk.
- 7.Do not store any inflammable objects near the installed place. The temperature of environment must be lower than 45°C and the relative humidity must be lower than 85%.

8.The installation of this product should be done by professionals.

**WARNING—DURING INSTALLATION!**

DO NOT PLACE ON SURFACES OR NEAR WALLS, PARTITIONS OR KITCHEN FURNITURE AND THE LIKE-UNLESS THEY ARE MADE OF NON-COMBUSTIBLE MATERIAL OR CLAD WITH NON-COMBUSTIBLE HEAT-INSULATING MATERIAL AND PAY ATTENTION TO FIRE PREVENTION REGULATIONS.

**Special announcement**

**WARNING!**

- It is not suitable for using in family.  
This product is commercial machine, it should be operated by trained cook.
- Do not dismantle or refit this product.  
When the product is in use, do not shake the top box and tilt it.  
The dismantlement and refitment will cause serious accident.
- Unplug the machine to cut off electricity before cleaning.  
When cleaning do not spray water on the product directly.  
Water can conduct electricity so the product may cause electric-shock accident by electric leakage.
- Do not pat the product or put heavy things on the top of it.  
Incorrect operation may cause the equipment damage and danger.
- High temperature will cause scald.  
When fire-facing oven is in use and before or after being used, do not touch directly body of trunk and chamber of top truck because of high temperature.

### **Notice!**

- When thunder and lightning is closing, user should shut off main switch to avoid appliance being damaged by lightning strike.
- Do not use hard and sharp object to destroy the surface of oven body and panel.
- After using, please shut off main switch.  
The installation and maintenance of electric circuit by professionals.  
If power cord is damaged, for preventing from danger, user should ask manufacturer or maintenance department or specific professionals to change it.

### **WARNING!**

- Do not use other power supply which is not marked in the product.
- Do not use main switch which is not coordinated with safety standard.

## **F. Instructions**

1. Before using, check whether the power installation is correct to assure the supplied voltage is coordinated with the suing voltage.
2. Plug on and green indicator is on which shows the oven is connected.
3. Rotate the temperature controller (proportional) clockwise and set the needed temperature, at this time the yellow indicator is on and shows the heating tube is operating.
4. Raise the top trunk, insert the food covered with crumb and cheese onto the stainless drop plate.
5. Pull upward and downward the handle vertically, adjust the distance between food surface and heating source and stop at the certain height according to the requirement of treatment.
6. When temperature reaches a certain degree, temperature controller will cut off power automatically, at the same time heating indicator is off and heating tube stops operating which shows to prepare for next one.
7. When top trunk rises to the top, the finished food can be taken out.
8. When temperature lowers down, temperature controller can connect power automatically, at the same time yellow indicator is on. Electric heating tube resumes operating and this process repeat time after time.
9. Rotate the ratio machine clockwise to the maximum position which is normal heating place that shows heating tube works from the beginning to the end but not heats in circulation way.
10. The oven with two temperature controllers can accord needs to heat separately or at the same time the operation is as easy as the operation of a temperature controller.
11. After finishing operation, rotate the temperature controller to off position at reverse

direction. Then plug off the equipment and cut down the power.

12. If the power cord is damaged, user should ask the professionals to change the same model and specification power cord.

### G. Cleaning and maintaining

1. Cut off power before cleaning to prevent from accident.
2. The stainless drop plate and drop net can be taken out to clean with water with non-corrosive cleaner. But do not use sharp knife to get rid of filth on the surface of oven.
3. After finishing operation, user can use wet towel containing non-corrosive cleaner to scrub the surface of oven and power cord. Do not spray water directly to clean body of oven in case of water inleakages into controlling trunk and destroy electric function and elevating structure.
4. If user does not use it at any time, user should shut power switch and temperature controller in time.
5. While the equipment is not used for a long period, user should clean the oven and put it in a well-ventilated warehouse with no corrosive gas.

### H. Circuit diagram

**ES-2800L**

**ES-4000L & ES-5600L**

HL1, HL3—POWER INDICATOR            HL2, HL4—HEATING INDICATOR  
 ST, ST1, ST2—TEMPERATURE CONTROLLER  
 EH, EH1, EH2—ELECTRIC HEATING TUBE    E—GROUND-CONNECTION

### I. Troubleshooting

Troubles	Checks	Solutions
1. Power indicator(green) is not on.	①If power is connected? ②If there is power supply? ③If power indicator is broken?	Change fuse Keep electricity supply be well Change power indicator
2. Heating indicator (yellow) is not on when heating tube is operating	①If heating indicator is broken? ②If connecting wire is loose?	Change heating indicator Get through the connector
3. Electric heating tube stops working.	①If heating tube is burned? ②If temperature controller is out of order?	Change electric heating tube Change temperature controller
4. Top trunk cannot rise and fall.	①If storage object locked between up trunk and back trunk? ②If back trunk elevating structure is out of order?	Open back board to repair

### J. Daily check

<b>Warning!</b>	
● Must check it everyday. Check the product usually in case of serious accident happens.	
● When user feels that there are problems in electric circuit or machine, user should stop using it. Please ask professionals to check and maintain it as soon as possible.	

Everyday before and after using the machine user should check it.	
Before using	If the machine is slanted? If power cord is old, broken and damaged? If the controlled panel is damaged?
In using	If there is strange or stinking smell? If the back board is out of shade by beating and affects elevating?

## **Waste disposal**

### **Discarding old devices**

At the end of its service life the discarded device has to be disposed in accordance with the national regulations. It is advisable to contact a company which is specialized in waste disposal, or just contact the local disposal service in your community.

### **WARNING!**

To exclude any abuse and the dangers involved make the waste device unfit for use before disposal. For that purpose disconnect device from mains supply and remove mains connection cable from the device.

### **CAUTION!**

For the disposal of the device please consider and act according to the national and local rules and regulations.

## **WARRANTY**

iMettos warrants to the original purchaser of every new product, under normal and proper use and maintenance service as specified by iMettos and upon proper installation and start-up in accordance with the instruction packet supplied with each unit. iMettos' obligation under this warranty is limited to a period of one (1) year from the date of original installation.

### **WARRANTY CLAIMS**

All claims for parts must be made directly through iMettos. All claims should include:

Personal Details:

Your name:

Your company:

Address:

Email:

Phone:

Products Details:

Model number:

Serial number of the product:

Date of purchase:

Proof of purchase :

Pertinent information supporting the existence of the alleged defect.(Such as picture etc.)

Please send the above information to [services@imettos.co.uk](mailto:services@imettos.co.uk)

Our warranty departments will according to the actual situation and reply you within 24hours

iMettoS Limited
