

Sun Protection for Kids in Cost-effective Quarts & Gallons!

1000+ applications

Lotions

Sprays

Savings

- Our bulk quarts and gallons provide savings of more than 45% over smaller sizes of sunscreen.
- Price per application is cost effective—over 1,000 applications in our gallon pump!
- Many centers add a “Sunscreen Fee”, to offset the additional cost of providing sunscreen.

Protection

- Even a single sunburn can increase a child's risk of skin cancer.
- One severe blistering sunburn may increase a child's risk of melanoma by 50 percent.
- Other forms of skin cancer (*basal cell and squamous cell*) occur from less severe sunburns that accumulate over time.

- **Gluten Free**
- **Reef Friendly**
- **Fragrance Free**
- **Oxybenzone Free**
- **Oil Free/Greaseless**
- **Broad Spectrum (UVA/UVB)**
- **Water Resistant (80 minutes)**
- **Dermatologist Tested**

Stop struggling with multiple bottles. Make sunscreen application easy and convenient!

A Bottle for Each Child

It's a beautiful sunny day, the children are excited for the outdoor excursion you've planned and are lining up to go when you remember they'll need to put on sunscreen. Now you're saddled with the task of matching "40 different bottles" of sunscreen to 40 different children. Then you've got to monitor each child to make sure he/she gets their sunscreen applied properly. Not only can this be a real hassle, it can also waste valuable time.

One Bottle for Everyone!

Imagine! No more digging through bins of different bottles of sunscreen with each child's name. Simply have all the children line up next to our **Gallon Pump** or refillable **Quart Spray** dispensing system, apply, and then send them out the door! It's the most economical and hassle-free way to make sure your kids are sun-safe for any outdoor activity.

Be a Sun-safe Facility

Whether you operate a school, camp or childcare center, your success depends on keeping kids safe. The American Academy of Dermatology has revealed that experiencing **five or more blistering sunburns during childhood increases one's melanoma risk by 80% and non-melanoma skin cancer risk by 68%!**

In addition to providing safe, broad spectrum sunscreen to camps, schools and childcare centers for over 30 years, we also provide a host of informational tools to help you educate your staff and the children in their care about sun safety. We feel it is vital that kids learn at an early age the importance of sun protection, so they can **develop sun-safe habits to help them avoid skin cancer later as an adult.**

Portable Products

Extended Excursions and Field Trips

For those times when you'll have kids outdoors for the majority of the day, it's always a good idea to bring portable sunscreen options with you. This way, it's easy for kids to re-apply as needed, especially considering they could end up in separate groups or different activities.
