FLOATING GRIP®

FLOATING GRIP®

FLOATING GRIP®

Hi, my name is Stephanie!
I would like to thank you for choosing FLOATING GRIP.
I designed the very first FLOATING GRIP Wall Mount back in 2014 for my own console, today we are selling globally.

We would love to see how you use your FLOATING GRIP for the perfect setup. Share a picture with us using #FloatingGrip.

Guide on how to mount your hanger by FLOATING GRIP®

Including

To do

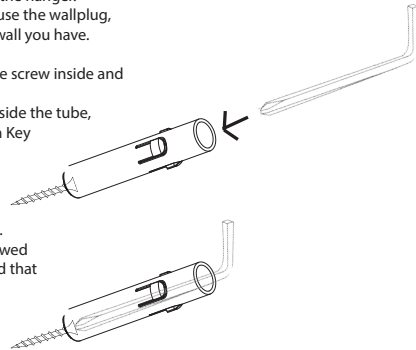

Step 1:

Make ready on the wall for the hanger. It might be a good idea to use the wallplug, depending on the type of wall you have.

Take the small tube with the screw inside and the Allen Key.

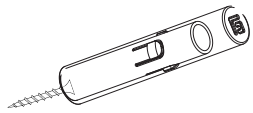

(if the screw isn't already inside the tube, you can easily use the Allen Key to put it back in).

Now put the Allen Key into the tube and start screwing into the wall. Make sure the screw is screwed all the way into the wall and that the tube feels secured and fastened.

Step 2:

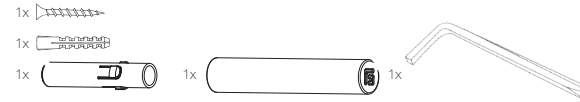

Now take the cover tube and place on the small tube. There is a small click that keeps the cover on. However, be aware that you will still be able to remove it.

Congratulations, you successfully mounted your hanger by FLOATING GRIP®
