

SEKO PA-9 DETERGENT PUMP WITH CONDUCTIVITY PROBE

Seko PA-9 Detergent Pump with Conductivity Probe, a high-performance solution designed for precise and efficient detergent dosing in industrial and commercial settings. The PA-9 Detergent Pump is engineered to accurately dispense detergent solutions based on conductivity measurements, ensuring consistent and optimal cleaning results. Equipped with a conductivity probe, the pump detects changes in solution concentration, allowing for real-time adjustments to dosage levels. Ideal for use in various applications, including warewashing, laundry, and sanitation processes, the Seko PA-9 Detergent Pump offers reliability and versatility.

SPECIFICATIONS:

Flow rate: 9l/h

Pressure: 0.1 bar

Tube: Sekoflex Power
supply: 90...265 Vac 3W

SOLD:
INDIVIDUALLY
