

JC-LGL Mini Wall Pack unit features an optional integrated photosensor and a die-cast aluminum housing that enhances heat dissipation. UL approved for wet locations, it mounts easily to standard junction boxes, offering instant energy savings and potential for rebates. Designed for longevity with a 50,000-hour rated life, it minimizes replacement and labor costs. The robust design ensures durability in harsh outdoor environments, while its easy installation and retrofit application make it a convenient and efficient lighting solution.

SPECIFICATION

- Output Lumens: 3,600lm
- Input Power: 30W
- Input Voltage: AC100-277V
- 120 LPW
- Color Temperature: 5000K
- Beam Angle: 120°
- Excellent thermal management design
- With Integrated photocell sensor
- Aluminum housing, comes in a black powder coat finish
- High reliable constant current LED driver
- IP Rating: IP65
- Operating temperature: -40°C to 40°C (-40°F to 104°F)
- Warranty: 5-Year

RECOMMENDED USE

- Site Lighting
- Security Lighting
- Pathways
- Entrances
- Perimeters
- Job sites
- Construction sites
- Mines
- Courtyard
