

D-Mannose

Clinical Applications

- Helps Maintain a Healthy Environment for the Urinary Tract's Mucosal Surface*

*D-Mannose features D-mannose, a simple sugar that occurs naturally in cranberries and pineapple. Research suggests that D-mannose interferes with lectin adhesion to the bladder wall, thereby supporting a healthy urinary tract.**

All Integrative Natural Health Formulas Meet or Exceed cGMP Quality Standards

Discussion

Amino acid and sugar complexes called lectins may be produced by certain organisms allowing them to adhere to the inside walls of the bladder and urinary tract, where they may continue to thrive.^[1]

D-mannose is a simple sugar produced in the body and occurring naturally in certain fruits, especially cranberries and pineapples. The adult dose of D-Mannose is more concentrated in D-mannose than these fruits or juices, and studies suggest that D-mannose is ten times more effective than cranberries.^[2]

Nearly all ingested mannose gets excreted through the kidneys and into the urine.^[3,4] Research suggests that lectins, present in the urinary tract and bladder, adhere to the D-mannose more readily than they do to the walls of the urinary tract. This action helps support the body's ability to flush out these unwanted particles through the urine.^[5] D-mannose users report that they can feel the effect in 24-48 hours.^[6]

D-Mannose is not capable of killing either "friendly" or harmful bacteria. It simply supports the naturally protective "flushing out" mechanism of the urine.^[6]

Supplement Facts

Serving Size: 1 Scoop (about 936 mg)
Servings Per Container: About 50

	Amount Per Serving	%Daily Value
D-Mannose	900 mg	**

** Daily Value not established.

Other Ingredients: None

Directions

Mix one scoop in 2-4 oz of water one to three times daily, or as directed by your healthcare professional.

Consult your healthcare professional prior to use. Individuals taking medication should discuss potential interactions with their healthcare professional. Do not use if tamper seal is damaged.
