SLICK CONCEPT BLUE

Concept Blue products are our next step towards a better future and an additional element in our Save Our Playgrounds campaign. Our R&D Team is dedicated to design products with the latest and most sustainable materials available on the market whilst maintaining quality and performance. To help protect our playgrounds, we are committed

to examining what we are already doing while continuing to explore what can be done in the near future and decades ahead. A sustainable ethos drives everything we do, from selecting and sourcing raw materials for our products to the manufacturing process and the lifecycle of everything we create. Concept Blue is the next chapter.

QUICK MOUNT

The Duotone Quickmount is a fast and secure way to connect your foil mast to the board in seconds. The base plate is mounted on the board, whilst the adaptor is on the mast. Board and mast can be mounted in seconds,

without the need for any tools. Forgotten are the times of forgetting tools, having the wrong tools, or fiddling around with screws = more time for fun on the water!
