

WETSUITS TECHNOLOGY LEVELS

	SELECT LEVEL	AMP LEVEL	CORE LEVEL	ELEMENT LEVEL
OUTSIDE	LIMITLESS FREEDOM OF MOVEMENT MAX_FLEX Max_Flex allows for the same stretch with less effort. Hence providing more flexibility and less pressure on the forearms. The fabric is quick drying and offers maximum comfort.	EPIC STRETCH MAX_FLEX AND ECO STRETCH Max_Flex allows for the same stretch with less effort. Hence providing more flexibility and less pressure on the forearms. The fabric is quick drying and offers maximum comfort. Eco Stretch is sourced from nylon waste. The best thing is that stretch properties are just as good as in conventional linings.	BEST BANG FOR YOUR BUCK MEDIUM STRETCH A smart combination of materials from higher levels makes sure that this wetsuit will give you a good time on the water.	ROBUST FLEXIBLE AND ROBUST Supra Tex knee protection and durable nylon protect the wetsuit from abrasion.
I_FOAM	 I_Foam is an extreme lightweight and stretchy neoprene foam. It partly consists of oystershell powder. Thanks to its lower density it contributes to heat insulation and better flexibility.		 The S_Type standard foam is made from limestone instead of oil. It offers good stretch and warmth.	
INSIDE				
	• Large area of Graphene_Plush for best possible heat retention and a fast drying suit • Hot_Stuff 2.0 in sleeves - the most stretchy thermo lining in our range	• Quick-drying Plasma_Plush 2.0 on back panel against windchill • Hot_Stuff 2.0 on body and legs for the perfect combination of warmth and stretch • Silk_Stuff on sleeves for high comfort level and more flexibility	• Hot_Stuff 2.0 for the perfect combination of warmth and stretch • Silk_Stuff on lower legs and sleeves for high comfort level • Plasma_Plush in the back area	• Silk_Stuff inside lining for a higher comfort level on the element level • Hot Stuff 2.0 in front and back body panel to keep the core comfortable warm
SEAMS	Maki_Tape 2.0 Highly elastic neoprene tape reinforces the seams on the lower body and commonly stressed cuff area from the inside.	Maki_Tape 2.0 Highly elastic neoprene tape reinforces the seams on the lower body and commonly stressed cuff area from the inside.	Maki_Tape 2.0 Highly elastic neoprene tape reinforces the seams on the lower body and commonly stressed cuff area from the inside.	

TECHNOLOGY FEATURES

**GRAPHENE_PLUSH**

Graphene is an impossibly light, strong and heat-conducting material. ION integrated this revolutionary material into their new inner lining – with the highest concentration you'll find in any wetsuit on the market. The result is up to 20% more warmth compared to ION's Plasma_Plush 2.0 lining. Also, Graphene_Plush guarantees an incredible drying time for your wetsuit, making sure it's always nice and comfy.

**PLASMA_PLUSH 2.0**

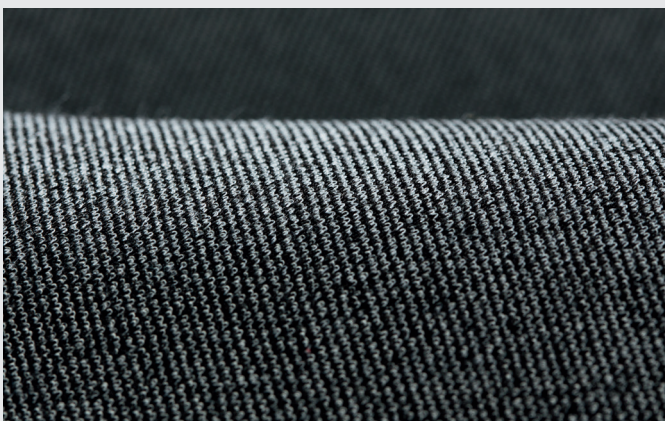

Premium lining offering the best of heat retention and stretch. The high pile fabric traps air for snuggly warmth and insulation while the vertically aligned channel structure transports moisture away quickly – for a dry suit after your break in between sessions.

**PLASMA_PLUSH**

Thanks to the looped structure, Plasma_Plush inside lining traps more air. The result is an insulating layer for increased warmth and plushy comfort.

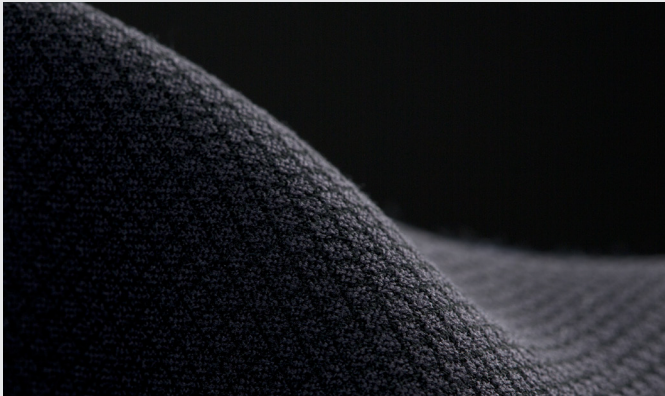

**HOT_STUFF 2.0**

The Hot_Stuff 2.0 comes with a plushier feel due to larger loops that trap more air for heat insulation. It is the stretchiest thermo lining in ION's entire range.

**SILK_STUFF**

Smooth inside lining for a comfortable feeling on bare skin. Despite its snuggly appearance it proves to be really hard core when it comes to the interior's superb flexible characteristics.

TECHNOLOGY FEATURES

**MAX_FLEX**

Max_Flex is our latest innovation in flexibility and stretch. The unique rhombus-shaped structure of this lining material allows it to be more flexible. Further does the material itself not soak up water but redistributes it on the surface thru small channels. This increases the evaporation of water and reduces drying time.

**ECO_STRETCH**

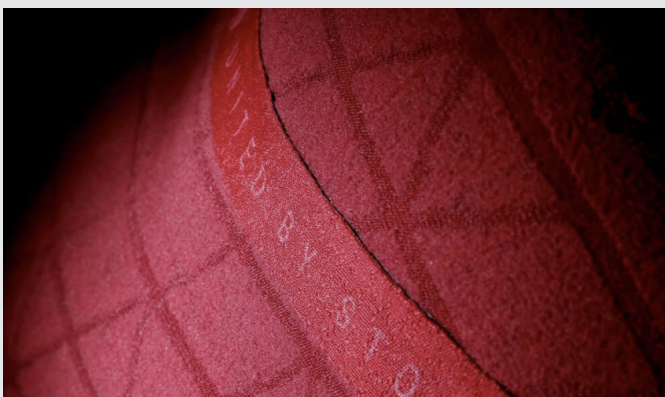

ION uses recycled nylon fabric for its exterior linings. The material is sourced from nylon waste, but the best thing is that its stretch properties are just as good as in conventional linings.

**SEAM_REINFORCEMENT**

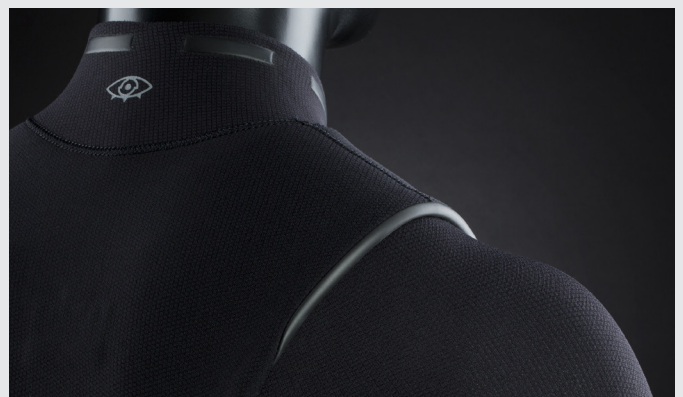

All stress points are reinforced and secured by melco tape from the inside to ensure a longer lifespan of the seams.

**CORDLOCK**

A soft cord lock for front-zip wetsuits that can be adjusted with just one hand. It's a subtle addition that won't bother you while riding.

**MAKI_TAPE 2.0**

Highly elastic neoprene tape reinforces the seams on the lower body and commonly stressed cuff area from the inside.

**SWEEP_CUT**

Seam-free shoulder design for increased paddle reach and shoulder rotation.

TECHNOLOGY FEATURES

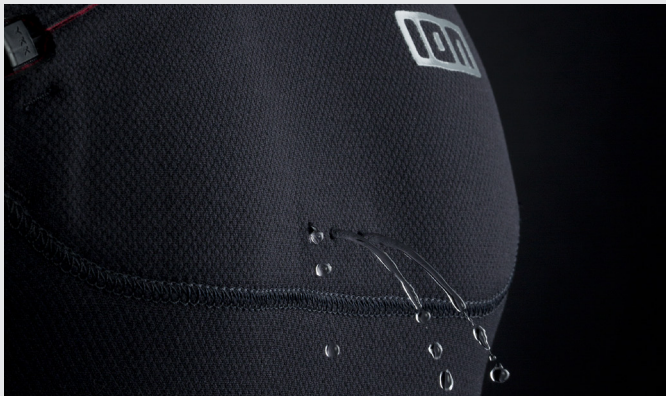

WATER_BARRIER

The Sealing_Print at the front zip opening area improves the connection between the flap and rest of the wetsuit. This silicone application prevents water from flushing into the suit hence contributing to the overall warmth properties.

POWER_SEAMS

Ultra slim outside sealing technology for a long lasting life span providing freedom of movement and comfort wrapped in a smart package. The Power_Seams add a special touch and unique look to all ION Select models.

DRAINHOLES

Small holes that allow water to exit the suit after a big flush. Drainholes won't let water in.
