

## DYMATIZE® BCAA 2200

Three branched chain amino acids in a 2:1:1 formula –  
high in vitamins B2 + B6

### Product description

After fitness workouts, metabolism remains elevated and the build-up of muscle protein is stimulated. Amino acids are the building blocks of these proteins.

Branched Chain Amino Acids (BCAAs) belong to the 9 essential amino acids, which cannot be synthesized by the human body itself – thus the intake needs to be covered through nutrition.

The BCAAs L-Leucine, L-Isoleucine and L-Valine make up approximately 20-35% of human muscle protein.

Conveniently sized and easy to swallow Dymatize BCAA 2200 capsules are perfectly suited for on-the-go in the morning, before or after training – delivering the three essential branched chain amino acids in a 2:1:1 ratio as well as vitamin B2 (riboflavin) and vitamin B6. Vitamin B2 and vitamin B6 contribute to the reduction of tiredness and fatigue.

- 1 serving (= 4 capsules) provides 2,2 g of BCAAs L-Leucine, L-Isoleucine and L-Valine
- Delivering three branched chain amino acids in a 2:1:1 formula
- Rich in vitamin B2 (riboflavin) and vitamin B6
- Free from gluten
- Banned substance tested by “Informed-Choice” for athletes’ assurance and highest product quality

### Suggested usage

- Take 4 capsules daily with sufficient liquid – e.g. in the morning, before or after training.
- This food supplement should not be used as a substitute for a varied diet. A balanced diet and a healthy lifestyle are important. Do not exceed the recommended daily intake. Keep out of reach of young children.

## Technical information

- 400 capsules per jar (100 servings)
- 12 jars per case
- Store in a dry place, protect against heat and direct sunlight.
