Safety and Warnings

Intended Use

NETTA Design is for domestic and indoor use only. This product is not intended for use by people who have lack of experience and knowledge or have reduced ability, or sensory and mental capabilities.

Regular Check-Ups

Check all the blades are functioning correctly.

General Warnings

- The optimum operating temperature is 80-250°C. Do not use over 350°C.
- A stove fan thermometer is recommended to monitor the temperature to avoid damage to the components due to overheating.
- Never place the fan on an unprotected surface if the fan base is still hot.
- Moving the fan when in use, unless in an emergency, is not advised. On this occasion, remember to wear protective gloves.
- Keep all obstacles at a distance while the fan is in use.
- Please ensure children and pets are supervised around the stove and stove fan.
- The stove fan will start operating at 50°C. It will spin faster as the temperature increases and will slow down as it decreases. The fan base will cool along with the stove once the fuel has burnt.
- Children shall not play with the appliance.
- Cleaning and user maintenance shall not be made by children without supervision.

Operating the Product

Do not position the fan before or near the chimney.

The optimum operating temperatures show are for reference and guide only. They may vary in different environments as they have been tested in controlled laboratory conditions.
