

A man and a woman are camping in a red and blue tent. The woman is sitting inside the tent, reading a book. The man is sitting outside the tent, wearing a green cap and a brown jacket, looking at the woman. In the foreground, a white MAX.ON power station is on a colorful blanket, with a smartphone on top of it. There are also some camping items like a thermos, cups, and a plate on the blanket.

MAX.ON

*Smart and clean
portable power for your
demanding devices*

Industry Innovative Portable Energy Storage Power

Max.On is an innovative portable energy storage power, which is with a built-in intelligent management system that can automatically manage the input and output, featuring a very perfect charge and discharge protection function; furthermore, it also supports fast charging and battery packs expandable. Both the portable energy storage power and the expansion battery packs can quickly charge laptop and mobile phones, which upgrades the user experience entirely, so that they can enjoy a top-notch life.
