TROUBLESHOOTING

The Speaker is not working.
- Check if the speaker is turned on and Volume is adjusted properly.
- Make sure that Bluetooth is enabled on the device you want to pair with the speaker. You can typically find this setting in your device's Bluetooth settings menu.

There is no power when the speaker is turned on.
- Check the speaker's battery level and ensure that the speaker has enough battery life to function properly. If it's not charged, connect it to a power source using the provided charging cable. Make sure the charging port is clean and not damaged.

The speaker is not getting charged.
- If the speaker is not charging, make sure that the charging cable is properly plugged into the speaker's charging port. Check the charging port for any debris or damage that may prevent the charging cable from making a secure connection.

The speaker is unable to get paired with my device.
- Try pairing the speaker with a different device to see if the problem is with your original device.
- Check the Bluetooth range and ensure that your device is within range of the speaker. If you're too far away from the speaker, the Bluetooth connection may drop.
