Endodontics

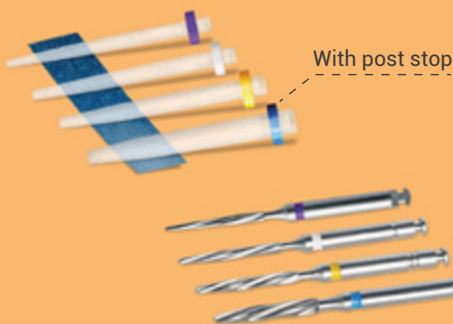

Exacto

Glass fiber intraradicular conical post

Best light transmission and double taper

With post stop

INDICATION

- Support of restorations and prosthetic crowns.

PRESENTATIONS

911	Opaque - Package with 5 posts N° 1 and 1 bur N° 1
912	Opaque - Package with 5 posts N° 2 and 1 bur N° 2
913	Opaque - Package with 5 posts N° 3 and 1 bur N° 3
914	Opaque - Package with 15 posts (5 of each N° 1, N° 2 and N° 3) and 3 burs (1 of each N° 1, N° 2 and N° 3)
915	Opaque - Package with 5 posts N° 1
916	Opaque - Package with 5 posts N° 2
917	Opaque - Package with 5 posts N° 3
9087	Translucent - Package with 5 posts N° 0.5 and 1 bur N° 0.5
9117	Translucent - Package with 5 posts N° 1 and 1 bur N° 1
9127	Translucent - Package with 5 posts N° 2 and 1 bur N° 2
9137	Translucent - Package with 5 posts N° 3 and 1 bur N° 3
9147	Translucent - Package with 15 posts (5 of each N° 1, N° 2 and N° 3) and 3 burs (1 of each N° 1, N° 2 and N° 3)
9097	Translucent - Package with 5 posts N° 0.5
9157	Translucent - Package with 5 posts N° 1
9167	Translucent - Package with 5 posts N° 2
9177	Translucent - Package with 5 posts N° 3

Reforpost® Metallic I

Stainless steel intraradicular posts

INDICATION

- Support of restorations and prosthetic crowns

PRESENTATIONS

749	Mini Kit I - Package with 20 units (5 units of each post size), 1 size 2 Largo bur, radiographic guide and post key
751	Refill 1 - Package with 5 units of size 1 post
752	Refill 2 - Package with 5 units of size 2 post
753	Refill 3 - Package with 5 units of size 3 post
754	Refill 4 - Package with 5 units of size 4 post
759	Package with 1 Post key

Reforpost® Glass Fiber and Carbon Fiber

Glass fiber and carbon fiber parallel intraradicular post with conical tip

Retentive shape

INDICATION

- Support of restorations and prosthetic

PRESENTATIONS

711	Carbon - Refill 1 - Package with 5 posts n° 1
712	Carbon - Refill 2 - Package with 5 posts n° 2
713	Carbon - Refill 3 - Package with 5 posts n° 3
720	Glass - Kit - Package with 30 posts (10 n° 1, 10 n° 2 and 10 n° 3), 3 Peeso (Largo) drills (1 n° 3, 1 n° 4 and 1 n° 5) and 1 radiographic guide
721	Glass - Refill 1 - Package with 5 posts n° 1
722	Glass - Refill 2 - Package with 5 posts n° 2
723	Glass - Refill 3 - Package with 5 posts n° 3
724	Glass - Mini kit - Package with 15 posts (5 n° 1, 5 n° 2 and 5 n° 3) and 1 radiographic guide
726	Glass - Refill 1 - Package with 10 posts n° 1
727	Glass - Refill 2 - Package with 10 posts n° 2
728	Glass - Refill 3 - Package with 10 posts n° 3

Reforpin®

Glass fiber intraradicular accessory posts

The solution for fragile roots

INDICATION

- Reinforcement of fragile roots
- Support of restorations and prosthetic crowns

PRESENTATIONS

796	Package with 5 units - universal shape
797	Package with 10 units - universal shape

Reforcore®

Prefabricated glass fiber structure for core build-ups

Post/core construction in one session

INDICATION

- Construction of prefabricated core build-up with prefabricated posts

PRESENTATIONS

934	Mini Kit Anterior - Package with 9 anterior cores (3P, 3M, 3G)
935	Mini Kit Premolar - Package with 9 premolar cores (3P, 3M, 3G)

Gates Drill

Endodontic access burs

Guaranteed access

INDICATION

- Preparation of the middle third and cervical of canals and consequential compensatory abrasion; pulpextomy and disobturation of root canals

PRESENTATIONS

1962	n° 1 - 32 mm - Package with 1 unit
1964	n° 2 - 32 mm - Package with 1 unit
1966	n° 3 - 32 mm - Package with 1 unit
1968	n° 4 - 32 mm - Package with 1 unit
1970	n° 5 - 32 mm - Package with 1 unit
1972	n° 6 - 32 mm - Package with 1 unit

Peeso Drill

Resistance and Longevity

INDICATION

- Intraradicular procedures

PRESENTATIONS

162	n° 1 - Package with 1 unit
164	n° 2 - Package with 1 unit
166	n° 3 - Package with 1 unit
168	n° 4 - Package with 1 unit
170	n° 5 - Package with 1 unit
172	n° 6 - Package with 1 unit

MTA-Fillapex

Bioceramic root canal sealer

The only one in the market with MTA

As biological as the pulp tissue

INDICATION
• For root canal filling

PRESENTATION

826	Tubes (30 g) - Package with 1 tube of base paste (12 g), 1 tube of catalyst paste (18 g) and 1 mixing pad
827	Syringe (4 g) - Package with 1 syringe (4 g), 15 automixing tips and 1 mixing pad
8288	Tubes (12 g) - Package with 1 tube of base paste (7,2 g), 1 tube of catalyst paste (4,8 g) and 1 mixing pad

MTA Angelus®

Bioceramic reparative cement

A super treatment for accidents and endodontic complications

- Ions Calcium Release
- Capable of inducing neoformation of periradicular cement
- Easy to use
- Bactericidal
- Low solubility: does not disintegrate
- Biocompatible to oral tissues
- Adequate compressive strength
- More radiopaque than dentin and bone

PRESENTATIONS

820	Package with 1 g of Gray MTA Angelus, 3 ml of distilled water and 1 scoop
821	Package with 2 g of Gray MTA Angelus, 3 ml of distilled water and 1 scoop
822	Package with 1 g of White MTA Angelus, 3 ml of distilled water and 1 scoop
824	Package with 2 applications of 0.28 g each White MTA Angelus, 3 ml of distilled water and 1 scoop

MTA Applicator

Instrument to apply MTA

Design and lightness

INDICATION
• To apply mixed MTA and other materials as Ca(OH)₂ in various cavities

PRESENTATIONS

155	Package with 1 unit (medium)
156	Package with 1 unit (small)

MTA Repair HP

Bioceramic high-plasticity reparative cement

NEW PRODUCT

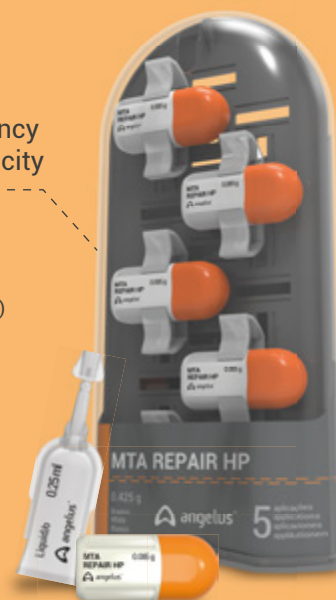

The same efficiency with better plasticity

INDICATIONS

- Treatment of iatrogenic or decay-related perforation (root and furcation)
- Treatment of root perforation associated with internal resorption
- Surgical treatment of root perforation
- Parendodontic surgery with retrofilling (Apicoectomy)
- Direct pulp capping
- Pulpotomy
- Apexigenesis
- Apexification

PRESENTATION

843	Package with 2 powder capsules with 0.085 grams each and 2 flasks
846	Package with 5 powder capsules with 0.085 grams each and 5 flasks
8469	Package with 10 powder capsules with 0.085 grams each and 10 flasks

Angelus® Östby Rubber Dam Frame

Frame for absolute isolation

Autoclavable

INDICATION
• Rubber dam sheet support

PRESENTATION
350 Package with 1 unit

Endo Dam

Light-curable resin for absolute isolation sealing

NEW PRODUCT

Absolute sealing

INDICATION
• Absolute isolation sealing

PRESENTATION
1215 Package with 1 syringe (2g) + 03 tips

Endodontic Ruler

Endodontic ruler (Gauge in millimeters)

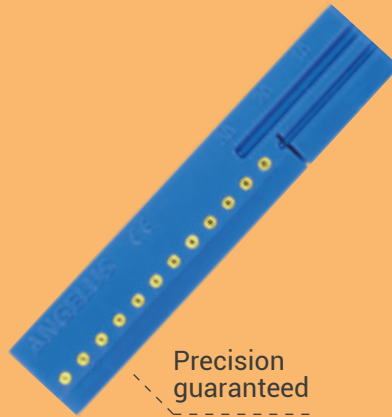

Sterilizable in dry heat and autoclave

INDICATION
• Measurements in endodontic procedures

PRESENTATION
850 Package with 1 unit

Intermedium

Calibrating ruler for gutta-percha points

Precision guaranteed

INDICATION
• Calibration of gutta-percha points and preparation of intermediate size points

PRESENTATION
854 Package with 1 unit

Amarilhinho

Ligatures for rubber dam isolation

Ideal sealing for the isolation

INDICATION
• Sealing of the rubber dam in dental procedures under absolute isolation

PRESENTATION
370 Package with 24 units (12 anterior and 12 posterior)

Endodontic Files Angelus®

Manual endodontic files

High resistance to fractures

INDICATION
• Biomechanical preparation (instruments) of the root canals

PRESENTATIONS
* Files Tipe K 1st and 2nd series (consult)
* Limas Hedstroem 1st and 2nd series (consult)

Endometric

Support for endodontic files

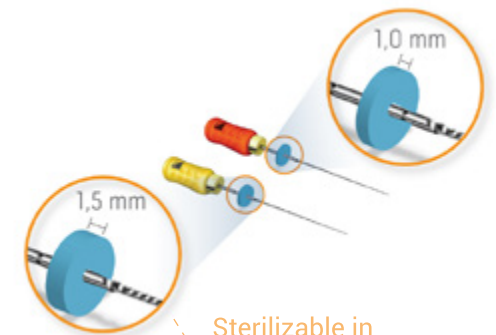

Safety and organization for endodontic files

INDICATION
• Support of endodontic files.

PRESENTATIONS
800 Package with 1 container and 30 units of fabric support
802 Package with 50 units of fabric support (refill)

Silicone Stop

Stop fabricated with silicone

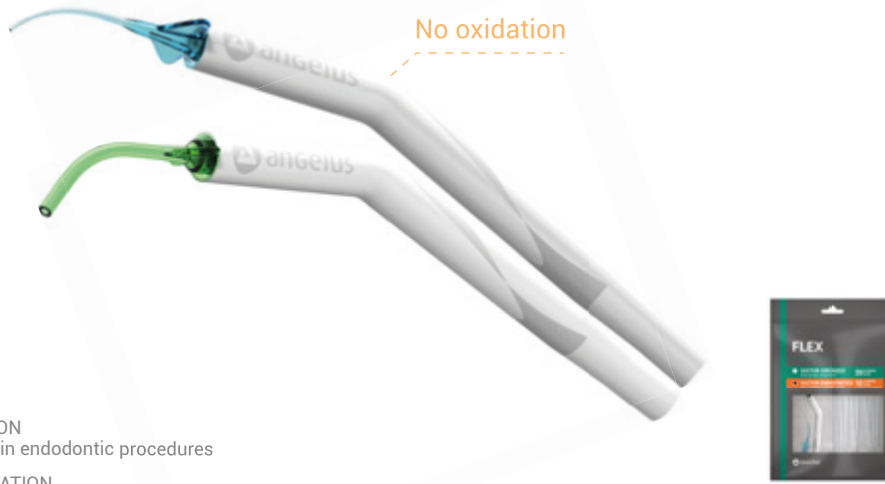

Sterilizable in autoclave and dry heat

INDICATION
• Working length indication in files during endodontic procedures

PRESENTATIONS
700 1.5 mm - Package with 100 units
701 1.0 mm - Package with 100 units

Flex Endodontic Aspirator

Endodontic aspirator

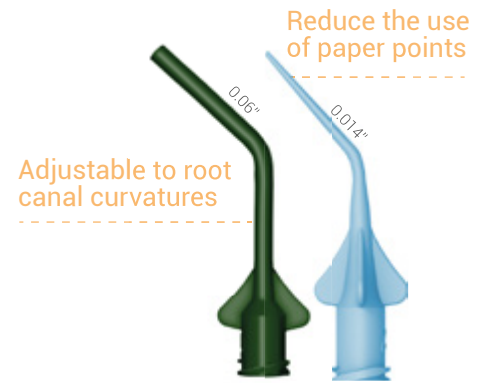

INDICATION
• Suction in endodontic procedures

PRESENTATION

573 Package with 10 aspirators, 10 initial aspiration tips (Endo Tips 0.06") and 10 final aspiration tips (Endo Tips 0.014") - all sterilized

Endo Tips

Aspirating tips

INDICATION
• Application of medicaments in the root canal

PRESENTATIONS

811	0.014" - Package with 20 units
816	0.06" - Package with 20 units

Clàriant Angelus® Home

Carbamide Peroxide

desensitizing formula

Exclusive case

- Ease in handling
- Less sensitivity during the treatment
- Control in the application

INDICATION
• Dental bleaching at home under supervision of the dentist

PRESENTATIONS

1200	10% - Package with 1 syringe of 3 g
1201	10% - Package with 4 syringes of 3 g each, 2 plates of Clàriant Tray and 1 exclusive case
1202	16% - 1 syringe of 3 g
1203	16% - Package with 4 syringes of 3 g each, 2 plates of Clàriant Tray and 1 exclusive case
1217	22% - 1 syringe of 3 g
1204	22% - Package with 4 syringes of 3 g each, 2 plates of Clàriant Tray and 1 exclusive case

Clàriant Angelus® Office 35%

Hydrogen peroxide

Safety for the dentist, comfort and results for the patient

INDICATION
• Dental Bleaching of darkened teeth, for professional use

PRESENTATION

1223	Package with 1 set of syringe (1,2 g), 1 intermediate tip and 1 application tip
------	---

Clàriant Angelus® Dam

Photopolymerizable gingival barrier

Easy application and removal

INDICATION
• Gingival protection during bleaching treatment

PRESENTATION

1212	Package with 1 syringe (3 g) and 3 application tips
------	---

Clàriant Angelus® Tray

Plates for individual tray

INDICATION
• Bleaching and bruxism mold

PRESENTATION

1218	1 mm - Package with 5 plates
------	------------------------------

Clàriant Angelus® D-Sense

Desensitizing gel

Exclusive design

INDICATION
• Recommended for the treatment of dental sensitivity caused by bleaching, periodontal treatment, thermal stimuli, and food

PRESENTATION

1211	Package with 1 syringe (2,5 g) + 3 application tips
------	---

3D Safemix

Mixing tips

25% saving

INDICATION

- Molding dental and gum structures

PRESENTATION

1870 Package with 12 units

3D Moldex

NEW PRODUCT

Disposable adjustable tray for double molding (partial or full)

Adjustable for full double molding

INDICATION

- For molding of the dental arches

PRESENTATION

254 Package with 12 units (half arch)

3D Moldex Bite

Disposable tray for bite record

The best record!

INDICATION

- Bite record

PRESENTATION

2491 Package with 6 units (full arch)

Moldex

Disposable partial trays for double impression and bite registration

Simultaneous impressions (superior and inferior)

INDICATION

- To take simultaneous impression of upper and lower partial arches and bite registration

PRESENTATIONS

250	Assorted - Package with 12 units (4 anterior and 8 posterior - 4L and 4S)
251	Anterior - Package with 12 units
252	Posterior - Package with 12 units (6L and 6L)

Autoclavable Tray

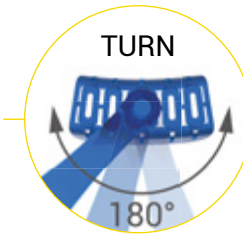

Full arch autoclavable plastic tray

NEW PRESENTATION

Partial trays

High retention for the impression materials

INDICATIONS

- Impression of full upper and lower arches
- Impression of dental implants

PRESENTATIONS

218	Partial - Package with 01 partial upper tray and 01 partial universal posterior tray
219	Refill 1 - Package with 2 units (S1, I1)
220	Refill 2 - Package with 2 units (S2, I2)
221	Refill 3 - Package with 2 units (S3, I3)
222	Refill 4 - Package with 2 units (S4, I4)

Nucleojet®

Prefabricated structure for impression

Posts confection in 15 minuts

INDICATION

- Fabrication of metal posts (technique of root canal impression)

PRESENTATIONS

100	Assorted - Package with 17 units - 10 pin and core - anteriors (2S, 4M, 4L) and 7 premolars (2S, 2M, 3L), 2 extra units of pins
101	Anterior - Package with 17 pin and core (5P, 8M, 4G)
102	Premolar - Package with 17 pin and core (5P, 8M e 4G), 3 extra units of pins
103	Pins - Package with 30 units (without core)

Pinjet

Pins for the fabrication of metal posts

Chemical adhesion to acrylic resin

INDICATION

- Fabrication of metal posts directly and indirectly

PRESENTATION

500 Package with 50 units

Provjet

Universal provisory crowns

Provisory crowns in universal shape

INDICATION

- Fabrication of temporary crowns in central and lateral incisors

PRESENTATION

300 Package with 12 units - 6 central incisors (2S, 2M, 2L), 6 lateral incisors (2S, 2M, 2L)

Contacto Paper and Arch

Articulating paper

Resistant to tensile stresses and moisture

INDICATION
• Registration of occlusal contacts in adjustment procedures of restorations, prostheses and dental surfaces

PRESENTATIONS

552	Arch - Package with 12 units
560	Paper - Package with 12 units

Contacto Film

Articulating film

Ultra thin (19 µm)

INDICATION
• Registration of occlusal contacts in adjustment procedures of restorations, prostheses and dental surfaces

PRESENTATIONS

553	Package with 12 units
555	Package with 140 units
556	Package with 280 units

Metalpin

Metal pins for retention of temporary crowns

New format: more retentive

INDICATION
• Construction of temporary crowns

PRESENTATION

400	Package with 30 units (10S, 10M, 10L)
-----	---------------------------------------

Silano

Adhesion promoter for porcelain (ceramic) and glass fiber

Pre-activated (ready to use)

INDICATIONS
• Treatment of internal surfaces of porcelain restorations and glass fiber posts before cementation with resin cements
• Treatment of porcelain surfaces before repair with composite resin
• Treatment of porcelain surfaces before bonding of porcelain

PRESENTATION

479	Package with 1 bottle (5 ml)
-----	------------------------------

Porcelain Etchant

10% Hydrofluoric Acid

More safety in adhesion of resin to ceramic

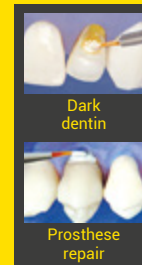

INDICATIONS
• Conditioning of metal free restorations fabricated with porcelain (ceramic) before cementation with resin
• Conditioning of porcelain fragments before bonding or repair with composite resin

PRESENTATION

952	Package with 1 syringe (2.5 g)
-----	--------------------------------

Opak

Light-cured opaquer resin

Alta opacidade

INDICATION
• Masking of dark and stained teeth, metal surfaces and carbon fiber posts

PRESENTATIONS

493	B 0.5 - Package with 1 syringe (1.5 g)
494	A 3 - Package with 1 syringe (1.5 g)

Fusion-Duralink® Phosphoric Acid

37% Phosphoric Acid (H₃PO₄)

Total etching

INDICATION
• Etching of dental surfaces (dentin and enamel) to improve the adhesion of materials in direct and indirect restorations and pit and fissure sealing and for the bonding of orthodontic brackets

PRESENTATION

6050	Package with 3 syringes (3 g each)
------	------------------------------------

Fusion-Duralink®

Bonding System

Chemically and light cured activated

INDICATION
• For direct restorations with composite resin
• Adhesive cementation of prefabricated posts (metal and fiber), cast metal posts and indirect restorations (metal, porcelain and composite resin)
• Bonding of orthodontic brackets
• Technique of adhesive amalgam

PRESENTATIONS

602	Catalyst - Package with bottle (2 ml)
603	Adhesive - Package with 1 bottle (4 ml)
604	Primer - Package with 1 bottle (4 ml)
606	Kit - Package with 1 bottle of Primer (4 ml), 1 bottle of Adhesive (4 ml) and 1 bottle of Catalyst (2 ml)

Aplik

Micro applicators for dental use

Versatility for the application of liquids and gels

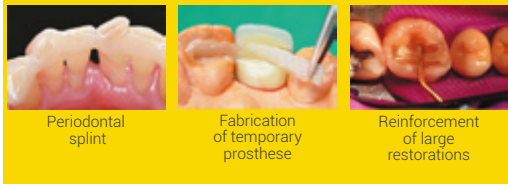

INDICATION
• Application of acids, primers and adhesives on the tooth, prior to restorations
• Application of acid and silane in prostheses, prior to cementation

PRESENTATIONS

120	Regular (green) - Package with 100 units
122	Fine (blue) - Package with 100 units
124	Extrafine (white) - Package with 100 units

Interlig®

Braided glass fiber impregnated with light-cured composite resin

The solution to immediate prostheses and splitting in Periodontics

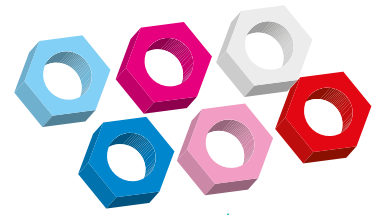

INDICATIONS

- Splinting in periodontics
- Splinting of traumatized teeth
- Fabrication of adhesive direct temporary prostheses
- Reinforcement of large restorations

PRESENTATION

483	Package with 3 units (8.5 cm each)
-----	------------------------------------

Silicon Instrument Marker

Organization and practicality

INDICATION

- Marking metal instruments in clinical use

PRESENTATIONS

650	Light Blue - Package with 60 units
651	Dark Blue - Package with 60 units
652	Pink - Package with 60 units
653	Rose - Package with 60 units
654	White - Package with 60 units
655	Red - Package with 60 units
656	Assorted - Package with 60 units

Mouth Opener

NEW PRODUCT

Comfort and safety for the patient

INDICATION

- To keep the mouth open during treatment

PRESENTATION

409	Package with 2 units (1S and 1L)
-----	----------------------------------

Triple Tips

Disposable tips for the air/water syringe

Guarantee of Biosafety

INDICATION

- Substitution of the air/water syringe metal tip in order to keep the biosafety

PRESENTATION

241	Package with 40 units
-----	-----------------------

Flex Surgical Ejector

20 EXTRA TIPS

More comfortable during handling

INDICATION

- Suction during surgical procedures in Dentistry

PRESENTATION

575	Package with 20 sterilized ejectors
-----	-------------------------------------

Flex Saliva Ejector

Disposable

The only autoclavable polymer ejector in the market

INDICATION

- Suction of saliva

PRESENTATION

570	Package with 30 units
-----	-----------------------

Implant bar

Prefabricated bars

Easy! Simple! Quick!

INDICATION

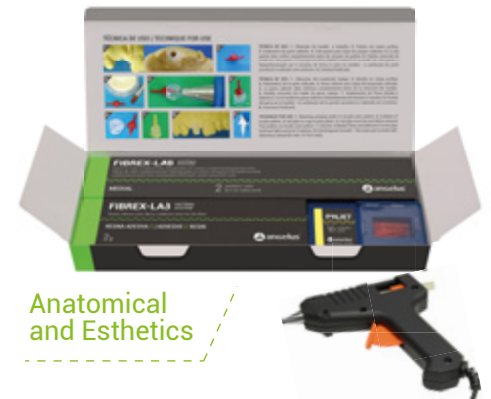

- Protocol bars preparation

PRESENTATIONS

296	Package with 60 bars
2960	Package with 30 bars

Anatomical Post Kit

Kit for the manufacturing of glass fiber anatomical esthetic posts

Anatomical and Esthetics

INDICATION

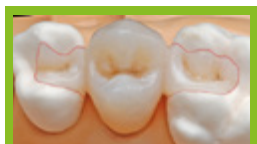

- Making aesthetic, anatomical, intra-radicular posts

PRESENTATION

4709	Kit - Package with 2 strips of Fibrex-Lab Medial (8.5 cm each), 1 syringe of Fibrex-Lab Adhesive Resin C (2g), 10 Pinjet pins and 1 hot glue gun (free)
------	---

Fibrex-Lab Pontic System

System with prefabricated glass fiber pontics for the structural reinforcement of adhesive prostheses

Adhesive prosthese

Adhesive prostheses in minutes

INDICATIONS

- Structural reinforcement of adhesive bridges fabricated with laboratory resin
- Structural reinforcement for the fabrication of direct (immediate) temporary prostheses

PRESENTATIONS

461	Refill - Package with 24 prefabricated pontics: 12 anterior (4S, 4M, 4L) and 12 posterior (4S, 4M, 4L)
4600	Kit - Package with 12 prefabricated pontics: 6 anterior (2S, 2M, 2L), 6 posterior (2S, 2M, 2L), 21 cm of Fibrex Medial, 2 g of universal adhesive resin and 4 ml of union agent

MZ Primer

Chemical Bonding agent for metal, Zirconia and Alumina

Safety for the adhesion

INDICATIONS

- To increase the adhesion of composite and acrylic resins to metal and Zirconia structures
- To increase adhesion in the cementation of crowns with metal or Zirconia frameworks and to treat metal surfaces during crown repair procedures with composite resin

PRESENTATION

964	Package with 1 bottle (5 ml)
-----	------------------------------

Spatula

Spatula for the sculpture of ceramic/porcelain and resins with ultra flexible blades and depth gauge

Ultra flexible blades and depth gauge

INDICATIONS

- Sculpture of ceramic/porcelain and resins
- Depth measurement
- Cutting of connectors, mamelons and incisal edges
- Removal of ceramics from palatal, occlusal and buccal surfaces

PRESENTATIONS

505	Kit - 1 Package with spatula and 12 blades (2 units of each type)
509	Blade Refill #1 - Package with 6 units (porcelain)
510	Blade Refill #2 - Package with 6 units (porcelain)
511	Blade Refill #3 - Package with 6 units (porcelain)
512	Blade Refill #4 - Package with 6 units (resin)
513	Blade Refill #5 - Package with 6 units (resin)
514	Blade Refill #6 - Package with 6 units (resin)

Silicon Dappen

Silicone Dappen

Base with two concavities

INDICATION

- Handling of medicaments

PRESENTATION

600	Package with 1 unit
-----	---------------------

Silicon Dappen

Sterilizable in autoclave

INDICATION

- Handling of medicaments

PRESENTATIONS

598	Extra Large (mixing colors) - Package with 1 unit
599	Large (mixing colors) - Package with 1 unit
601	Small (mixing colors) - Package with 1 unit

Large Silicone Container

Flexible

INDICATION

- For handling plaster, alginate and other dental materials

PRESENTATION

195	Package with 1 unit
-----	---------------------

Plaster Spatula

Anatomical

INDICATION

- For handling gesso and alginate

PRESENTATION

620	Package with 1 unit
-----	---------------------

Paladon Jar

Silicone jar with lid

Nonstick

INDICATION

- For the manipulation of acrylic resin

PRESENTATION

621	01 Paladon jar unit with lid
-----	------------------------------

Simplified!
