BEE & YOU

FROM THE FASCINATING ANATOLIA

WOMEN OWNED BUSINESS

BEE&YOU's story began when Dr. Asli Samanci, a mother, a scientist, and an entrepreneur, started struggling with a health problem of her 5-year-old son. Her son was getting sick frequently and was often treated with antibiotics, eventually developing an autoimmune disease due to his weakened immune system. The doctor advised to give her son propolis and royal jelly to support his immune system. Knowing that many propolis products in the market were of low quality or worse adulterated, Dr. Samanci got some raw propolis from a beekeeper and devised a pioneering (later to be patented) way to extract propolis in her lab, resulting to a miraculous drop which cured her son after a 6 months of consumption. As a result of this experience, in 2013 she decided to become an entrepreneur and founded BEE&YOU to start production of propolis as a natural immune enhancer for all the children and mothers in the world who had similar problems. BEE&YOU has today been granted more than 70 awards internationally for its innovative, award-winning, and patented extraction method and for woman entrepreneurship.

Why BEE&YOU

FROM THE FASCINATING ANATOLIA

- Total experience of our founders about bees and bee products are more than 45 years. We are the experts in the field, especially about determination of quality and authenticity about bee products.
- We develop **all** formulations in our R&D Center with contributions of pharmacologists, pharmacists, nutritionists, and dermatologists.
- Our propolis extraction technology is patented worldwide, and we guarantee to provide the highest quality propolis extract with clinically proven health benefits.
- We produce **all** our bee products with the help of our 5000 contracted beekeepers who take care 550,000 beehives. We implement a sustainable contracted beekeeping model as a perfect example of Fair Trade. That is how we can guarantee the best quality bee products with %100 traceability from our hives to your table.
- We produce **all** our products at our facilities, which is about 115,000 sq ft., being one of the largest value-added bee products centers worldwide.
- Our facilities and products are certified to meet international standards for food, supplements, and cosmetics. We hold certifications including GMP, BRC, IFS, SEDEX, ISO 9000, ISO 22000, ISO 14001, Kosher, Cosmos, and Organic.
- We have been granted with 70 awards in the last 10 years for innovation, product quality, woman entrepreneurship and sustainability projects.
- We aim to increase the bee population in the world: 1% of **all** the income gained from sales of each Bee&You product goes back to our beekeepers so that they can buy new beehives and look after more bees!

As Einstein said "When the last bee dies, humanity has at most 4 more years to go" .

"IF THERE ARE BEES, THERE IS LIFE!"

SUSTAINABILITY

Sustainable Fair Trade Beekeeping Model

We produce all of our bee products in collaboration with our 5,000 contracted beekeepers, who diligently tend to 550,000 beehives.

Through our sustainable contracted beekeeping model, we exemplify Fair Trade principles, ensuring the highest quality of bee products with 100% traceability from our hives to your table.

Our Contracted Beekeeping Model not only generates sustainable value for society but also supports beekeepers. In our commitment to increasing the global bee population, we allocate 1% of all income from the sales of each BEE&YOU product to our beekeepers for the acquisition of new beehives. This allows us to help raise the number of bees and protect the environment.

BEE & YOU
FROM THE FASCINATING ANATOLIA

OUR PARTNERS

INGREDIENTS

FROM THE FASCINATING ANATOLIA

Anatolian Propolis

Propolis is a natural bee product that honeybees collect from plants' leaves, buds, and stems. Honeybees use propolis to protect their hives from fungi, bacteria, and viruses. It acts as a natural protective barrier. We source our propolis from the pristine Anatolian mountains, home to 12,000 different plant species and one of the most biodiverse regions in the world.

Royal Jelly

The royal jelly is a valuable bee product that is excreted by worker bees to feed baby bees and the queen bee in the hive. Being fed only with royal jelly, the queen bee grows 2 times bigger and lives 30 times longer than other bees.

10-hydroxy-2-decanoic acid (10-HDA) is an unsaturated healthy fatty acid found only in royal jelly and has been reported to have many health benefits. Scientific studies show that royal jelly supports brain activity, cardiovascular health, and immunity, increases collagen synthesis in the body, energy and physical performance, and brain activity, and has anti-tumor activity*.

Royal Jelly is also suggested to be consumed for its potential benefits on fertility, as it supports the health of both male and female gametes*.

BEE&YOU Royal Jelly has 2 times more (10-HDA) content compared to any other competitor's brand in the market*.

Raw Honey

BEE&YOU Raw Honey is 100% natural, unpasteurized, and unfiltered, preserving all the natural nutrients sourced directly from the hive. It retains the full range of health benefits, just as the bees produce it!

Scientific studies have demonstrated that raw honey exhibits antimicrobial activity against a wide range of pathogens.

BEE&YOU Raw Honey stands out with twice the antimicrobial activity compared to many other raw honey products available in the market*.

Bee Pollen

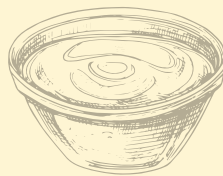

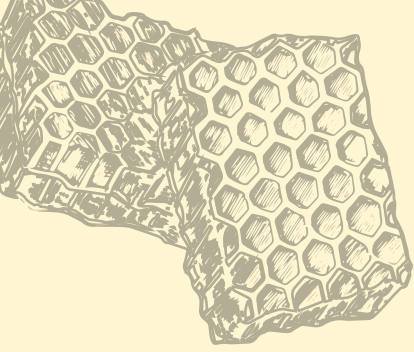

Pollen is a powdery substance consisting of pollen grains which are male microgametophytes of seed plants, which produce male gametes.

Bees use fresh pollen to feed larvae and store the excess in honey cells. This supply of stored pollen is used to feed larvae and nurse bees when fresh pollen supplies are low.

Without a good supply of pollen, the colony will be unable to produce brood at all. The nurse bees eat the high-protein food and secrete royal jelly to prepare cells for eggs and feed young larvae.

Bee Pollen is cited as "nature's most complete food" after mother's milk and egg, due to its rich nutrient content. It includes vitamins, minerals, and protein, anyone can actually survive only by feeding on pollen and water.

OUR PRODUCTS

FROM THE FASCINATING ANATOLIA

PATENTED PURE ANATOLIAN PROPOLIS EXTRACTS

BEE&YOU Anatolian Propolis Extract (A.P.E)[®] acts as a natural remedy for cold & flu or seasonal allergies with a fast-acting effect! Anatolian Propolis Extract (A.P.E)[®] contains at least 15 phenolic and flavonoid compounds such as caffeic acid phenethyl ester (CAPE), chrysin, galangin and pinocebrin.

How to Consume: As a superfood, consuming at least one teaspoon or more as needed every day, preferably between meals or before exercise, is recommended. It can be consumed directly, with bread, or mixed with milk, muesli, yoghurt, smoothie, or fruit juice.

NATURAL SOURCE OF PROBIOTICS

BEE BREAD

Bee bread is a natural bee product that bees collect from the pollens of flowers, and they store and ferment it in a honeycomb with their own enzymes. Bee bread naturally contains vitamins, minerals, amino acids, proteins, lipids, carbohydrates, phenolics, and flavonoids that have natural antioxidant activity. Additionally, bee bread is probiotic as it contains beneficial microorganisms produced during the natural fermentation process by bees.

Benefits:

- Immune support
- Rich in antioxidants*
- Allergy relief
- Anti-inflammatory
- Natural source of probiotic microorganisms**
- Improves gut health**
- Source of natural protein, vitamins & minerals

Ingredients: Bee Bread (100%)

*Natural antioxidant content is min. 175 mg per serving (5 g)

**Lactobacillus and Bacillus

Suggested Use: It can be consumed directly or mixed with foods such as milk, muesli, yoghurt, or fruit juice of your choice. It is suggested to consume at least 6 granules for adults and 3 granules for kids per day, or more as needed.

OUR SCIENTIFIC PUBLICATIONS

We Prioritize Science!

At Bee&You, we collaborate with universities to conduct clinical studies that reveal the proven effects of Bee&You products. These potent, evidence-based products are gluten-free, non-GMO, pesticide-free and free from additives, colorants and preservatives. Moreover, they are safe and suitable flavor options for both children and adults.

Unique formulations for all Bee&You products are developed in our company's Research and Development center and protected by patents. At Bee&You, we are passionate about generating robust scientific data on Anatolian bee products. To date, we have over 30 preclinical and clinical studies examining our products and ingredients!
