

# VA PACT ACT

## PERFORMANCE DASHBOARD

FEBRUARY 02, 2024

ISSUE TWENTY-SIX  
Published Bi-weekly on Fridays

In this VA PACT Act Performance Dashboard, we are demonstrating our commitment to transparency by sharing with all stakeholders—internal to VA and externally—key performance metrics and data we are using to assess our success in implementing the PACT Act.

If you, a Veteran, family member, or survivor would like more information about the PACT Act and your VA benefits, please start here:

### Highlight

A top priority for VA in 2024 is continuing to reach and encourage Veterans to enroll in VA health care. Partly thanks to the PACT Act, we have seen a 26.2% increase in health care enrollments year-over-year among Veterans. Our health care is delivered by people who know how to treat Veteran-specific conditions, because they see Veterans every day. In fact, many of our clinicians are Veterans themselves. That's a big reason why Veterans who are enrolled in VA health care are proven to have better health outcomes than non-enrolled Veterans—and our patient satisfaction rates outperform the private sector.

### Making a Difference Through the PACT Act

Curtis Paarmann served in the U.S. Army from May 25, 1988, to October 31, 1996, during the Gulf War Era and peacetime. Mr. Paarmann filed his first claim for PACT Act service-connected benefits in March 2023 after his roommate encouraged him to apply. He was awarded a 100 percent disability under the PACT Act, along with several other service-connected disabilities, resulting in a 100 percent disability rating. He received \$44,754 in retroactive benefits. Mr. Paarmann shared that the PACT Act will now allow him to pay off his medical bills from his cancer treatment. He encourages all Veterans and survivors to apply for care and benefits under the PACT Act.

## VA IS EXPANDING CARE AND BENEFITS FOR VETERANS AND SURVIVORS

The PACT Act is perhaps the largest health care and benefits expansion in VA history. In this section, we are measuring the overall impact of the PACT Act in terms of its expansion of health care and benefits.

### Expanding Benefits

### Definition

This statistic identifies the total number of VBA benefits claims with at least one PACT Act related condition received since August 10, 2022.

This trust score reflects the percentage of Veterans who respond to the survey question, "I trust the VHA [Facility Name] for my health care needs" with a score of 4 or 5.

Percentage of PACT act disability claims where at least one condition was granted (regardless of whether or not the condition was filed under PACT).

This metric indicates the length of time it takes VBA to process a PACT Act-related benefits claim. This is measured from the date VA receives a claim to the date VA finished processing the claim and closed it out + 1 day, to eliminate the possibility of claims being completed in 0 days (ex. claim completed on the day it was received).

The Average Days to Complete (ADC) for PACT Act Related Claims is calculated based on the date VA received the claim, not the date VA began processing those claims. VA prioritized and completed some claims related to terminal illnesses, but VA did not begin processing most claims until January 1, 2023. As a result, the current value of ADC is inflated by any time between the date the claim was received and the January 1, 2023 implementation date for processing. The high ADC for PACT claims demonstrates VA's commitment to completing oldest pending claims first.

This statistic identifies the number of VBA benefit claims with one or more PACT Act-related conditions that have been completed in 125 days or less.

This metric identifies the number of completed PACT disability claims where at least one issue was granted.

The PACT Act Planning Population consists of Veterans where VA has a high level of confidence they are a member of one or more of the three PACT Act eligible cohorts (Vietnam, Gulf-War, Post 9-11). VA is using this population as a means of identifying the impact of the PACT Act on enrollment in VA health care.

This statistic measures the number of new enrollees in VA health care that fall within the PACT Act Planning Population to understand the impact of the PACT Act on enrollment. By design, this more focused metric will always be a subset of the metric above that shows overall new enrollment regardless of whether a Veteran is in an eligible PACT Act cohort. Together these two enrollment metrics help identify both the broad impact of PACT Act on enrollment - for example, those who may enroll for VA health care because of the publicity of PACT Act but are not directly eligible because of PACT Act—and the more direct impact of PACT Act—meaning those who are enrolling from populations VA assesses as becoming eligible due to the PACT Act.

This statistic identifies the total new VHA enrollments (newly registered healthcare beneficiaries) for the periods of August 2022-End of Current Month 2023 and August 2021-End of month 2022, for comparative analysis purposes.

This number identifies the change between 2023 and 2022 VHA enrollees during the same time period.

This calendar identifies key activities or outreach events occurring in the coming weeks.

### Definition

This statistic identifies the number of Veterans who have received a VHA Toxic Exposure Screening. Every Veteran enrolled in VA health care will receive an initial screening and a follow-up screening at least once every 5 years. Veterans who are not enrolled and who meet eligibility requirements will have an opportunity to enroll and receive the screening.

The screening will ask Veterans if they think they were exposed to any of these hazards while serving: Open burn pits and other airborne hazards, Gulf War-related exposures, Agent Orange Radiation, Camp Lejeune contaminated water exposure and/or Other Exposures.

This statistic identifies the number of VHA Toxic Exposure Screenings where a Veteran identified **at least one exposure** to toxic substances. It includes the number of Veterans who received the screening, the number of Veterans who identified at least one potential concern related to a toxic substance exposure, and the percentage of responses in which Veterans identified at least one instance of toxic exposure during the screening.

This statistic identifies the number of VHA Toxic Exposure Screenings where a Veteran identified **exactly one exposure** to toxic substances. **Please note the difference from the metric above – the metric above includes Veterans who identified at least one (includes both those who identified one exposure and also those who identified more than one exposure); this metric only includes Veterans who identify exactly one exposure.**

This statistic identifies the number of VHA Toxic Exposure Screenings where a Veteran identified **more than one exposure** to toxic substances. **Please note the difference from the metric above—the metric above includes Veterans who identify exactly one potential concern; this metric includes Veterans who identify more than one potential concern.**

Priority Groups: When Veterans apply for VA health care, they are assigned to 1 of 8 priority groups that impact how soon they are signed up for health care benefits and how much they may have to pay (if anything) toward the cost of care. To learn more about the factors that impact assignment, please visit <https://www.va.gov/health-care/eligibility/priority-groups>.

This metric measures the number of new enrollees who were specifically enrolled with an authority provided by the PACT Act (P.L. 117-168). This includes 1-year Special Eligibility, 10-Year Special Eligibility, Agent Orange Exposure, and Radiation Exposure. For more on information on eligibility for enrollment, please visit [www.va.gov/pact](http://www.va.gov/pact). VA utilizes a number of authorities to enroll Veterans, both authorities granted in the PACT Act and pre-existing authorities. VA applies the authority that will result in the Veteran being placed into the highest priority group possible.

This metric identifies the total number of VBA benefit claims with at least one PACT Act-related claimed issue received each week.

This metric identifies the number of VBA benefit claims with at least one PACT Act-related condition completed each week.

This statistic identifies the total number of VBA benefits claims with at least one PACT Act related condition received since August 10, 2022.

This statistic identifies the total number of VBA claims with at least one PACT Act related condition completed since August 10, 2022.

This number identifies the total VBA benefits claims received each week not related to PACT Act.

This number identifies the total VBA benefits claims completed each week not related to PACT Act.

This metric identifies the average number of days it takes VBA to process a PACT Act related benefits claim.

This statistic identifies the current number of VBA benefit claims with one or more PACT Act-related conditions that have been pending for 125 days or less.

This statistic identifies the number of VBA benefit claims with one or more PACT Act-related conditions that have been completed in 125 days or less.

This metric identifies the average number of days it takes VBA to process a Non-PACT Act related benefits claim.

This statistic identifies the current number of pending VBA benefit claims with one or more Non-PACT Act-related conditions less than 125 days old.

This statistic identifies the number of non-PACT VBA benefit claims that have been completed in 125 days or less.

This statistic identifies the cumulative total of VBA benefits claims received since August 10, 2022, which are not related to the PACT Act.

This statistic identifies the cumulative total of VBA benefits claims completed since August 10, 2022, which are not related to the PACT Act.

This metric identifies the unique number of Veterans and Survivors who have filed a PACT Act benefit claim which VBA processed to completion.

This metric identifies the unique number of Veterans who filed a PACT Act benefit claim which VBA processed to completion.

This metric identifies the unique number of Survivors who filed a PACT Act benefit claim which VBA processed to completion.

## Stewardship

Reminder: Stewardship information will be included in every other issue of this dashboard publication (or when updated data is available).

### Metric/Term

Full-Time Equivalent Employee (FTE)

Account

Permanent Employee

Term Employee

Onboarded

Funds Allocated

Obligations

### Definition

Full-Time Equivalent refers to the total number of regular straight-time hours worked by employees divided by the number of compensable hours applicable to each fiscal year (regular method), or the total regular hours worked in a fiscal year (2,080 hours) divided by 26 biweekly pay periods (pay period method)(as per OMB A-11 Circular § 85.5(c)).

Account refers to a separate financial reporting unit used by the Federal Government to record budget authority, outlays and income for budgeting or management information purposes as well as for accounting purposes.

An employee who has been hired under an appointment that is not time delimited.

An employee for whom the agency has granted a term appointment (of employment) of more than 1 year but usually not more than 4 years.

Onboards (i.e., the number of personnel encumbering positions) are the number of employees (i.e., headcount) onboard when the data are reported. Note: "Onboards" differ from "FTE," which is a budgetary term based on compensable hours as opposed to headcount. Colloquially, "onboards" refers to newly hired employees who have started work with VA (their hiring is complete).

The amount of funding provided to each Administration or Staff Office.

Obligation means a binding agreement that will result in outlays, immediately or in the future.
