NEW PRODUCTS

FlexREACH System™

Cut, prune and saw with the all-new FlexREACH System™ from Corona® Tools. This innovative modular system combines our tree pruner and RazorTOOTH Saw™ blade into one easy-to-use, extendable pole saw. Simply lock your pruner or saw head into place and extend the pole to make quick work of cutting or pruning hard-to-reach branches. For lower branches, simply detach the saw blade to use it as a hand saw. Easily store and transport your FlexREACH System by collapsing the pole to 5 ½-ft. Components sold separately.

DETACHABLE SAW HEAD

TP13001

- Can be used as a hand saw or attached to the pole to cut branches that are out of reach
- RazorTOOTH sharpness and 3-sided teeth cut 2X faster
- Durable hardened steel
- Lifetime warranty

PRUNER HEAD

TP13005

- For cutting branches and limbs up to 1¼-in
- Dual-pulley power requires less effort
- Heavy-duty smooth action chain drive system
- Ergonomic angled head
- Lifetime warranty

EXTENDABLE POLE

TP13489

- Extends to 15-ft; collapses to 5 ½-ft
- Fiberglass safety outer pole
- Aluminum lightweight inner poles
- Use with TP13001 Saw Head and TP13005 Pruner Head
- Telescoping pole collapses for easy transportation and storage
- Lifetime warranty

MAX ALL-STEEL SHOVELS

STRENGTH & DURABILITY

MAX ALL-STEEL SHOVELS

Unleash maximum digging and prying power with these all-steel shovels. The closed-back blade design provides extra strength and eliminates dirt buildup, while the solid steel end cap under the red grip allows for tamping. The thick, powder-coated, aerospace-grade steel handle is welded to the 12-gauge blade to ensure durability.

ABOUT LIFT

- Handles with larger lift provide greater leverage.
- Handles with smaller lift allow a nearly vertical cut.
- Flat-bowled heads are nearly flat for straight cuts.
- Deep-bowled heads are concave for "cupped" cuts.

The 1-in LIFT on AS 90310 allows for a nearly vertical cut. Maximum accessibility in tight spaces

The 2 1/2-in LIFT on AS 90320 allows for increased leverage.

MAX PRUNERS

STRENGTH & DURABILITY

MAXFORGED *Aluminum* Bypass Pruners

Crafted with lightweight forged aluminum handles and non-slip grips, these durable bypass pruners feature high-carbon steel blades for lasting performance and narrow profile hooks for easy access to tight areas. Geared pivot nuts allow for precise blade adjustments and built-in wire cutters and sap grooves add versatility. Volute springs resist clogging and maintain smooth cutting action, while rubber bumpers absorb shocks.

Determine Maximum Cut Capacity

- What is the largest diameter you are considering cutting?
- Not every branch is suitable for cutting with a lopper
- Consider the hardness of the branch
 - Bypass loppers are best for cutting green, live branches
 - A High-Torque Bypass Lopper can cut hard or frozen branches
 - Anvil loppers are best for cutting dry or hard branches
- Consider your own physical condition, ability and experience
- Be safe: use a saw if a branch is too big or too hard to cut

Determine Intensity and Frequency of Use

- Professionals can continuously make thousands of large cuts a week: all Corona® MAXFORGED loppers offer lifetime warranties and most offer extensive replacement parts to get the job done, season after season
- Landscaping enthusiasts, casual gardeners and homeowners can make hundreds of moderate-sized cuts a month maintaining their yards and gardens: Corona® RED loppers feature design innovations that can make cutting easier and more comfortable

STRENGTH & DURABILITY

RazorTOOTH Saw®

Discover unparalleled cutting efficiency with Corona's RazorTOOTH Saw®, crafted through four manufacturing processes for maximum durability, hardness, and friction reduction. The triple-ground impulse-hardened teeth remove 2X more material per stroke, while the higher-carbon SK5 steel blade stays sharper longer. The chrome-plated blade minimizes friction and improves overall efficiency.

TREE PRUNERS

FlexREACH System™

Cut, prune and saw with the all-new FlexREACH System™ from Corona® Tools. This innovative modular system combines our tree pruner and RazorTOOTH Saw™ blade into one easy-to-use, extendable pole saw. Simply lock your pruner or saw head into place and extend the pole to make quick work of cutting or pruning hard-to-reach branches. For lower branches, simply detach the saw blade to use it as a hand saw. Easily store and transport your FlexREACH System by collapsing the pole to 5 ½-ft. Components sold separately.

NEW

MAX SHEARS & SNIPS

STRENGTH & DURABILITY

Since the late 1920s, when other manufacturers were settling for stamped or cast tools, Corona® has been using high-quality forged steel to deliver superior performance and reliability. Generations later, these classically designed agricultural shears and snips are shearing California grape vines, pruning lemon, orange and avocado trees in the Southwest, apple trees in the Northwest, Midwest and East, while clipping, plucking and shaping landscapes around the world.

The Corona® Promise

The lifespan of a tool is dependent upon frequency of use, as well as the conditions and environment in which it is used.

Tools used by professionals, everyday, on every job, will more likely wear out long before tools used by occasional or infrequent users. Typically, any defects in materials or workmanship will emerge early in the life of the tool.

Corona® tools are designed, engineered and manufactured to perform their intended purpose, season after season.

Customer satisfaction is at the top of our priority list, so in the event our tool fails to perform as intended due to materials and/or workmanship, Corona promises to provide a solution based on our warranty coverage.

WHAT'S COVERED

Corona tools are guaranteed to be free of defects in materials and workmanship. The tools are backed either by a 1-year or lifetime warranty. Visit coronatools.com for product warranty details. If a Corona tool is found to be defective due to the manufacturing process or the materials used, Corona will replace it free of charge once the tool has been returned along with the original proof of purchase.

WHAT'S NOT COVERED

Corona is dependable and trustworthy and we rely on our customers to be the same. We do not and cannot cover normal wear, lost or stripped parts, altered or modified products, or product damage due to negligence, misuse, or abuse.

CORONA DEFINITION OF ABUSE- Using a tool in a manner for which it was not designed.

PRODUCT SUBSTITUTION

Corona will make an effort to replace any defective tool with one that is similar. If, for any reason, this is not possible, Corona may choose to satisfy your claim by substituting a different product.

GENUINE REPLACEMENT PARTS

All Corona tools are built to last, but certain components will wear out after heavy or repeated use. That's why we offer genuine replacement parts for most MAX products. Visit coronatools.com to see available replacement parts by item number, or contact the **Corona Customer Experience Team** for more information at the number noted below.

MAKING WARRANTY CLAIMS OUTSIDE THE U.S.

The warranties outlined here apply specifically to products purchased in the United States. If you purchased your product outside of the U.S., your local Corona distributor's standard product warranty will apply. Outside the U.S., warranty claims can be made by returning the tool to where you bought it within the relevant time frame, along with its packaging and original proof of purchase.

Corona reserves the right to ask Dealers and Distributors to send in product photo and contact information for a warranty claim. In some cases, a Return Merchandise Authorization (RMA) number may be required for product returns.
