We believe the things we  
surround ourselves with are  
*a reflection* of who we are.

At Acre Made, we firmly believe that the objects and pieces of furniture we choose to surround ourselves with are a representation of our values, tastes, and personal style. It is through these selections that we make a statement about who we are and what matters most to us. Our custom process allows you to choose the perfect dimensions, materials, and finishes for your space, ensuring that your furniture will be one-of-a-kind and truly reflective of your style. The best part? They're built to last, so that you can pass your one-of-a-kind piece down from generation to generation.

## Built just for you with *sustainably-sourced* materials.

When we build, we give special consideration to the materials we use – we know they can make or break a piece. All of our materials are solid and sustainably harvested, native Ontario hardwood species.

**WOOD SPECIES**

Ambrosia Maple

Ambrosia is a popular choice for furniture because it offers a great mix of affordability and durability. The grains in this wood are quite intricate, giving it a slight rustic appearance. It's perfectly suitable for all wood furniture when working with a budget.

NATURAL  
AMBROSIA MAPLE

AMBER  
AMBROSIA MAPLE

ESPRESSO  
AMBROSIA MAPLE

**WOOD SPECIES**

Oak

Oak is one of the most premium and durable hardwood species that are domestic to Ontario. This wood has a warm natural colour and can take a variety of finishes beautifully!

---

NATURAL OAK

OILED OAK

WHITENED OAK

ESPRESSO OAK

BLACKENED  
OAK

SMOKED OAK

**WOOD SPECIES**

Walnut

This species is very desirable because of its natural, rich colour. Walnut varies from a light brown to a dark chocolate brown depending on the finish you choose. It typically has a clean, straight grain. Along with Oak, this is a very popular, premium hardwood.

---

WARM WALNUT

BLACK WALNUT

**WOOD SPECIES**

Ash

Ash is very suitable for furniture-making because of its straight grain appearance and durability. It can sometimes be mistaken for oak because of the similar "cathedral" grain pattern.

---

BLEACHED ASH

**WOOD SPECIES**

Cherry

A durable, stable, straight-grained wood. This wood has an even texture with a natural lustre. Cherry in its natural form is stunning with the colour becoming more vibrant over time. There are many heritage homes in Ontario with cherry millwork that has stood the test of time and aged beautifully. We think cherry is an under appreciated wood - it's one of our favourites!

# The custom process is easy.

Your home should be a space that perfectly fits your lifestyle and meets your needs. Let us help you make your house a home with furniture that's made just for you.

## CONTACT US

[hello@shopacremade.com](mailto:hello@shopacremade.com)

1-647-556-2290

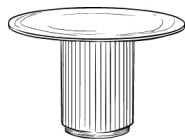

### 1. COMPLIMENTARY CONSULTATION

You tell us your ideas and needs. We go over everything from measurements, to materials, to product preferences. From there, you receive a custom quote based on our consultation.

### 2. DESIGN AND BUILD

We work one-on-one with you throughout the creative process – you'll be able to review drawings and share feedback. Once the design of your piece is finalized, we can build it!

### 3. COMPLETION AND DELIVERY

Our team of professionals deliver and set up your custom furniture. We love this part – seeing you experience your new custom furniture for the first time in your home.
