President's Note

Why choose us? Choose Us because we build superior electric-mobility products. The first thing you'll notice when looking under the hood of our products is the simplicity in design. Instead of over-engineered component integrations, we use a straightforward modular component design that reduces downtime and service costs. Put simply, Exeeder is a tier-1 provider.

Choose us to join us in making history. Exeeder Fleet is division of Derek Automotive, the company making history as the nation's first minority-owned electric vehicle manufacturer, and we're asking you to become a part of our growth story, by becoming a customer, dealer, or distribution partner. Launched in 2019, we're already built our first SUV and electric pickup truck, along with a line of eBikes, eScooters, and electric golf carts which are shown in this product brochure.

To learn more about us visit exeederfleet.com or gofurther.biz.

Warmest regards,

Derek W Bailey
CEO, Exeeder Fleet, Inc.

LEADING-EDGE TECHNOLOGY

Our company has a series of patents related to a parallel alternative charging system that recharges the battery packs of our electric vehicles.

SUPERIOR SERVICE

Each customer is assigned to a service manager who coordinate's service technicians at your location or with a local service partner.

FINANCING / LEASING

We have financing and leasing plans for consumers and businesses at very favorable rates and terms.

UPGRADES / CUSTOM UPFITTING

We are a tech company that can make your wildest design wishes come true. We can modify and upfit your vehicles to suit your needs. Just ask!

SUPERIOR DESIGN

Our Proteus system is integrated with the best battery and battery management systems on the market in a labeled and documented, easy to learn and repair, modular design.

MINORITY-OWNED

In addition to providing superior products and services we help corporations check a few other boxes while receiving outstanding value and service.

Xe Low-Speed Flatbed Truck

About

Introducing our All-Electric Flatbed Pickup Truck: the game-changer in eco-friendly construction and appliance delivery. Designed to meet the demands of the modern construction industry, this electric vehicle combines the efficiency of electric power with the practicality of a spacious flatbed, making it perfect for transporting all sorts of construction materials, including drywall, and large appliances. With zero emissions and a powerful electric motor, this truck is not only gentle on the environment but also offers significant cost savings on fuel. The robust flatbed design ensures easy loading and unloading, enhancing operational efficiency for businesses. Its capacity to handle heavy loads without compromising performance makes it an ideal choice for delivering large appliances and bulky construction materials. Safety and driver comfort are paramount. The cabin is designed for comfort, featuring air conditioning, heating, and a modern radio system, making every delivery a pleasant experience.

Our All-Electric Flatbed Pickup Truck is more than just a vehicle; it's a sustainable solution for businesses looking to streamline their operations and reduce their environmental impact. Make the switch to smarter, greener deliveries with our cutting-edge electric flatbed truck.
