

## **How to determine if the Harrison Specialties Universal Custom turf striper can be used on your mower deck.**

We offer this turf striper kit for folks interested in mounting a custom turf striper on their particular machine. Although we cannot confirm the fit on any particular machine this turf striper can be used in a wide variety of applications.

### **To determine if this kit can be used on your machine begin by answering the following questions while reviewing the drawing found on page 2 of this document.**

1. - Are there flat surfaces on your mower deck for mounting the two 1 wide x 4 long mounting brackets?
2. - Is there enough room between the tires and mower deck to accommodate the turf striper assembly that extends 4 1/8 inch behind the mower deck?
3. - If the turf striper assembly will not fit between the tires and the deck, is there room between the tires to mount a short turf striper assembly?
4. - Is there any supporting hardware or other machine parts that the turf striper roller will hit when the mower deck is raised to the maximum height?

If you've answered yes to questions 1, 2 or 3 and no to question 4 above it's likely that this striper can be mounted on your machine.

### **Next determine the roller length.**

This process begins by determining the placement of the 1 x 4 mounting brackets on your mower deck. They need to be mounted on a flat surface as far apart as possible. Then measure is the distance between the outside of the brackets in the proposed location. On the drawing this distance is 39.75. Notice this is 0.75 longer than the 39" roller shown on the drawing. So to determine the length roller you need simply subtract 0.75 from the measurement of proposed location for the mounting brackets. Here's an example: If the outside distance between the mounting brackets measures 35.75" you subtract .75" from that and the roller will need to be 35".

To order the proper roller simply select the roller size you need from the drop down box on our web page for this turf striper.

If you don't see the length you need we may be able make a special length for you.

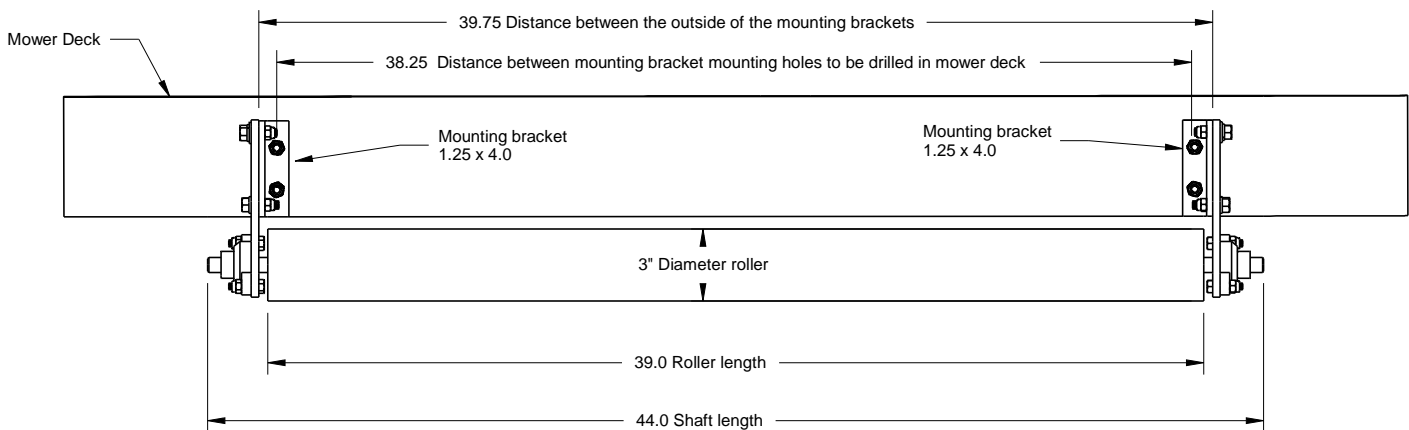

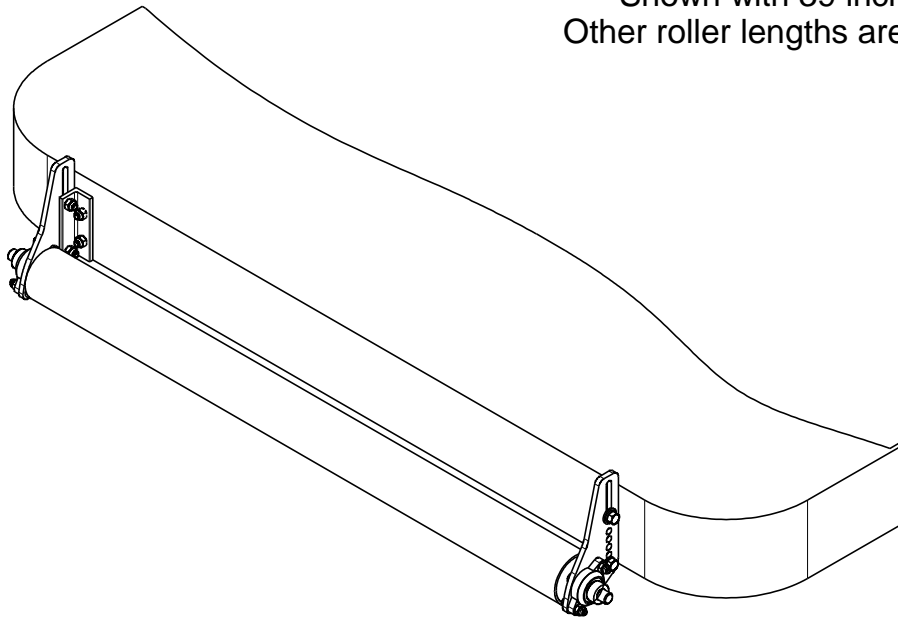

Should you need any clarification on this or have any questions at all be sure to let us know.

Thanks for your interest in our turf stripers, we really appreciate it.
